

## HAND MADE COLORS

An innovative concept achieved in all Color-Rare store locations. The walls are lined with numerous samples of products, finishes and colors. On the tables are various color charts and behind the Color Bar is a team of Colorists mixing their pigments and creating our clients' chosen colors.

For all the Do-It-Yourselfer's, this concept is now available and can be achieved in the comfort of your own home. You are your own Colorist, giving free reign to your creativity.

The nuances on this color chart were done by hand, in our workshop in France, with our NOVITA paint.

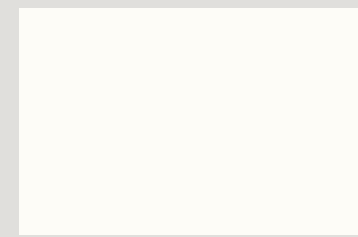

These colors are created with pigments and are based on recipes invented by Color-Rare. Once fully dried, the color on the chart will be similar but may have slight variations.

Tailor your own unique finish.
