

Care and Handling of StoneLite Designs Lampshades

The *StoneLite Designs* lampshade line offers a beautiful and unique way to decorate your interior space. Each lampshade is made with stone material, giving it an elegant and natural appearance that can complement any room. However, because these lampshades are unsealed, they require special care and handling to ensure their longevity and beauty. In this guide, we will discuss the best practices for the care and handling of your *StoneLite Designs* lampshade.

Understanding Nominal Sizes

Before we dive into care instructions, it's important to understand that all sizes of our lampshades are nominal. This means that while their dimensions may be listed as a specific size (e.g., 12 inches) there may be slight variations due to the handmade nature of our products. Please keep this in mind when ordering and measuring your lampshade.

Avoid Touching with Bare Hands

Our lampshades are unsealed and therefore susceptible to staining and discoloration if handled improperly. We highly recommend avoiding touching the stone portions of the lampshade with bare hands. The grease from people's fingers can be absorbed by the stone, resulting in unsightly marks and discoloration.

To prevent this, we suggest using clean gloves if you need to handle the stone portions of the lampshade. To clean the lampshade, wipe it down with a cloth or a duster-type tool, DO NOT use water. This will help maintain its pristine appearance and prolong its lifespan.

No Returns for Improper Use or Handling

At *StoneLite Designs*, we take immense pride in our meticulous craftsmanship and the unparalleled quality of our products. Each lampshade is meticulously handcrafted by our skilled artisans, ensuring its exceptional uniqueness and customized nature. With attention to every detail, we strive to create lampshades that not only illuminate your space but also serve as a work of art.

However, given the delicate essence of nature, we cannot accept returns for instances of improper use or mishandling. We kindly request that you carefully consider your order and ensure that you have selected the right size for your specific application, as each lampshade is one of a kind.

It's important to note that our lampshades are exclusively designed for interior use. They are not suitable for outdoor environments and should not be exposed to harsh weather conditions or extreme temperatures. To maintain their pristine condition, we advise handling them with utmost care and caution, avoiding any accidental dropping or mishandling.

With *StoneLite Designs*, you can expect nothing less than exceptional quality, exquisite craftsmanship, and a product that will beautifully enhance your space for years to come.

Proper care and handling of your *StoneLite Designs* lampshade is crucial for maintaining its beauty and longevity. By following these guidelines, you can ensure that your lampshade will remain a stunning centerpiece in your interior space for years to come.
