

GT15000E **PUSH BUTTON ELECTRIC START** 11500W GENERATOR

A highly versatile single & three-phase machine with a massive 11500W (max) power output, multiple heavy duty power-outlets, and ATS, the GT15000E allows for easy powering of a house, workshop or work-site and make an ideal back-up generator in natural disasters.

The 40L fuel tank and industrial quality of the GT15000E will keep you in power all day. The unique GT Power features like the industrial air cleaner, muffler system, superior-duty copper wound alternator, automatic voltage regulator and low oil alert will allow you to tackle any task.

Robust industrial frame for added protection

Lifting Arm for easy moving

Push button electric start for effortless starting

Large Capacity 40L Fuel Tank

Industrial Air Cleaner and Muffler System

Convenient carry handles for moving around the worksite

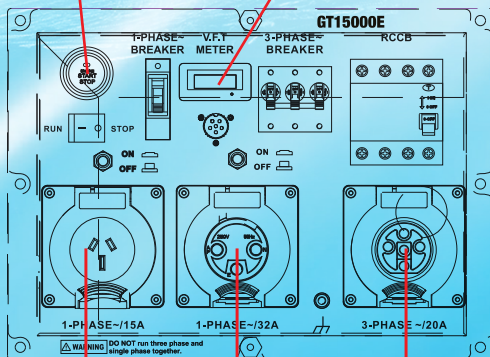

1x
THREE PHASE (20A) OUTLET

2x
SINGLE PHASE (15A & 32A)

Solid Wheels for Rugged Portability

Push button electric start for effortless starting

Frequency-Time Meter

15A-single phase outlet

32A-single phase outlet

20A-three phase outlet

Three Phase - 415V
Single Phase - 230V
