WAGNER

LinePainter - Marking system

Marking

easily with Airless technique

The line painter can be connected to any airless system. Simply fix the airless gun, with the TradeTip 2 Line Finish marking nozzle, onto the Line Painter and connect to the airless system through a high-pressure hose (up to 30 m). Ideal for company and school parking areas, outdoor communal areas or exhibition and industrial buildings.

Direct trigger for the gun on the guide handle..

Handy and compact: ideal for use in tight working areas.

Flexible:

quickly modified in a few operations to mark radii, lines or narrow angles.

Precise:

The TradeTip 2 Line Finish nozzle was developed specifically for lining and marking work. With sharp edges and the uniform distribution of material the Line Painter can be used with any airless gun. There is a choice of different line widths available.

Equipment
