

MATT'S CHAT

"Life is 10% what happens to us and 90% how we react to it."

– Charles R. Swindoll

Many of you reading this would have had interactions with one of Millin's superstars – Catrina. Her contribution to Millin over the past 3 years has been nothing short of amazing. A company is only as good as the staff that represent it, and she has definitely made us so proud. For the last 2 years while battling cancer, Cat has continued working and giving so much more to Millin than was ever deserved. Cat always hassled me to have the newsletter done on time, and I would always leave until the last minute. This one is for you kid – it's a week early! From the bottom of my heart - Thank You xxx

PRO-ACTIVE BATTERY POWERED RESPIRATORY PROTECTION – INTRODUCING THE POWERCAP

Respiratory protection is an industry wide issue, how we manage these situations is getting easier, with a wide range of options now available.

The introduction of battery powered Positive Pressure Respiratory Protection has created a solution that is convenient, affordable and user friendly.

The PowerCap Active Battery Powered Respirator Cap is an innovative product and one of the standout solutions.

The PowerCap by JSP Safety is perfect for dusty environments and light industrial applications like woodworking, automotive, construction, and where general respiratory protection is needed.

MATT'S PRODUCT REVIEW OF THE MONTH

36 Piece
Wire Brush Workshop
Box – includes Wire Cups,
Wheels and End Brushes

An excellent accessory
to any workshop or
tool box, providing an
assortment of wire
brushes for all
your needs.

How it works

The battery powers a small fan unit that actively pulls contaminated air through the filters pushing clean filtered air into the mask area. The PowerCap supplies the filtered air at a rate of 160 litres per minute.

Advantages of using a PowerCap respirator

Not only providing a respiratory solution, the PowerCap also gives you eye and bump protection, all the while being lightweight and ergonomically designed for maximum comfort during use.

- » **Low user fatigue.** The air is supplied freely rather than having to pull it through with your own breathing.
- » **No fit testing required.** Can be used with facial hair.
- » **No visor misting.**
- » **Keeps you cool** even when doing strenuous work.
- » **Very light** at only 720gm and comfortable to wear.
- » **8 hour battery life** before recharging.
