SuperFinish

HEA HIGH EFFICIENCY AIRLESS

SuperFinish Spray Systems

DIAPHRAGM PUMPS FOR EVERY PROJECT

- The versatile SuperFinish range pumps provide a superior finish on a range of different surfaces, with the different configurations providing flexibility for various projects.
- Wear resistant tungsten carbide valves and solvent resistant polyamide diaphragms
- QLS (Quality Long Stroke) technology for improved performance
- The longer stroke of the diaphragm enables a very wide range of materials to be worked with, from thin liquids to high-viscosity materials
- Low maintenance and more durable

SF23 Pro 2-in-1

- Versatile and robust, the perfect all-rounder for multiple application types.
- Compact – smallest in its class, mobile and lightweight.
- Robust – ideal for demanding construction site use.
- Comes complete on Collapsible Cart including both Flexible Suction System and 5 litre Hopper, 15 metre Airless Hose, Vector Pro Airless Gun and Base, 517 HEA Pro Tip, 310 Fine Finish Tip, HEA Pressure Gauge & Tool Kit.
- Note: Replacement hose is the standard grey rayon braid

SF23 HD SprayPack

Specifically designed for use as a pump for heavy duty spraying. Comes complete with an AG-14 Heavy Duty Airless gun featuring an insulated handle.

The stainless steel fittings are specially designed for longer life against harsh materials whilst allowing the smooth control of flow of materials.

- Stainless steel paint head for long life and toughness against harsh materials
- Easy, prime and spray gate valve
- Stainless steel valve with pressure regulator for control of smooth flow of material
- Telescopic handle for ease of movability
- Stainless steel fitting on pump head and valves to facilitate the use on all different types of applications
- Large shock absorbing wheels for ease of moving over those uneven worksites
- Robust Frame for the tough environments
- Push and ball valve for a direct prime and application procedure

THE BENEFITS OF DIAPHRAGM PUMP TECHNOLOGY

Diaphragm pumps are a great choice when it comes to handling a wide variety of materials, from thin liquids to high-viscosity paints. QLS technology and low stroke frequency puts less stress on the components, significantly extending the service life of the pump and reducing maintenance costs. Valves are made of wear-resistant carbide and the diaphragm is made of solvent resistant polyamide.
