

Walcom[®] **SLIM KOMBAT**

KEVLAR[®] FIBER &
MAGNESIUM TECHNOLOGY

PATENT PENDING

The new road is traced:
magnesium and Kevlar® fiber.
Lightness, strength,
reliability.

SLIM KOMBAT

A unique spraygun in its conception, which combines the tradition of a historical product and tested as Slim, to the lightness of a magnesium body over-injected Kevlar® fiber.

The Walcom® revolution continues, after Genesi Carbonio here is Slim KOMBAT.

Advanced materials, unique and patented solutions, top quality performance with all types of paints and reduced consumption in compliance with ecological regulations.

The spirit of tradition in the basic components, combined with the innovation of the materials that make up the body, generate a unique result in the market.

Car Refinish, industry, woodworking: Slim KOMBAT is a true professional and universal spraygun, suitable for all sectors and painting.

The consolidated construction philosophy of the new generation Walcom® spray guns, leaves unchanged all the fundamental hinges of the traditional spraygun, such as needle-nozzle-aircap, metal body structure, combining materials of modern design and chemical formulas that ensure durability, strength and reliability over time. All these features generate a concrete and real advantages for endusers.

WEIGHT

380 g. Walcom® range is now the company that offers the lightest spray guns on the market, unapproachable in this by competitors thanks to its patented solutions.

PERFORMANCE

Slim KOMBAT has been improved in the project, to offer a greater and more airflow for the benefit of a finer atomisation and a better paint layout, for primer, basecoat or clearcoat. The processing on 5-axis CNC machines, guarantees total quality and consistency in each production lot.

STRENGTH

Absolutely resistant to solvents, cleaning products and impacts thanks to the chemical characteristics of Kevlar® fiber, Slim KOMBAT is a spraygun designed to last over time and to maintain intact its performance characteristics.

PACKAGE

- Rigid plastic suitcase, containing spray gun with cup, seals / springs kit, filters, cleaning brush and service key. Pressure regulator and gauge (HVLP and HTE versions).
- Box in glossy silk-screen cardboard, containing airbrush, seals / springs kit, cleaning brush and service key.

CLEANING

Its smooth, strong and free surface porosity ensures extremely easy cleaning of the surface and maintenance of the spray gun in optimal conditions.

BODY

Body in die-cast and sandblasted magnesium, CNC machined with 5-axis technology. Lightness and resistance.

OVER-INJECTION

The whole body in magnesium is over-injected in Kevlar® fiber, to guarantee its strength and durability over time.

FTA

Fast Turning Aircap, the new system for fast unscrewing and screwing the aircap ring in 1/2 turn.

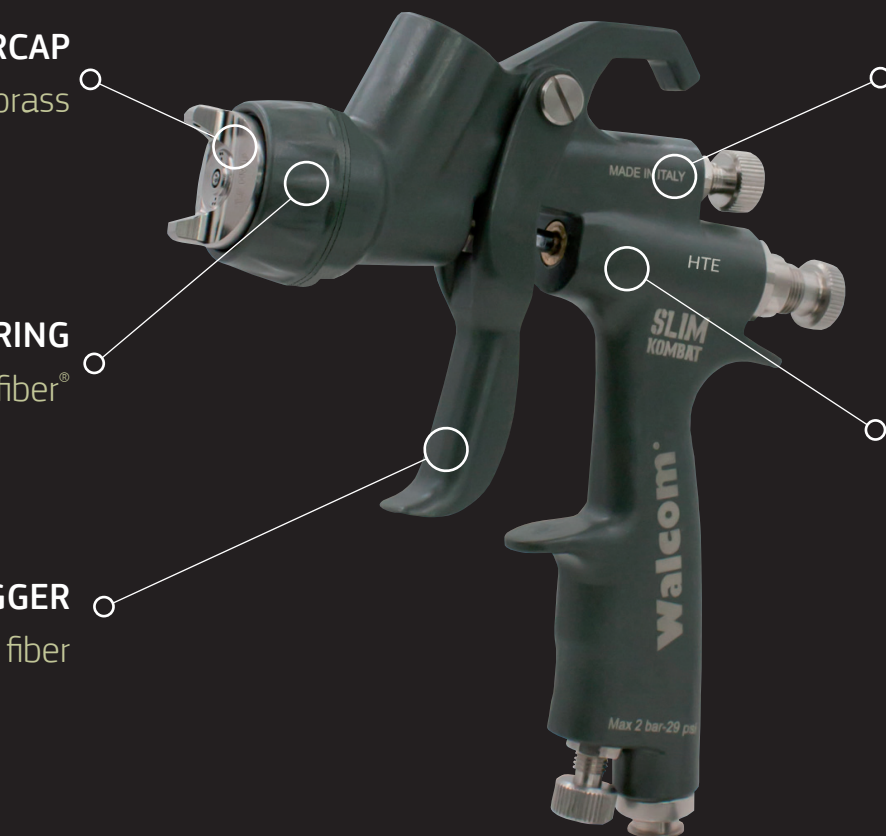

AIRCAP
Nickel-plated brass

AIRCAP RING
Kevlar fiber®

TRIGGER
Kevlar® fiber

**NEEDLE-NOZZLE-
SPRINGS:**
AISI 303 stainless steel

BODY
Die-cast magnesium
and Kevlar® fiber

HVLP

HTE

HTE SR
