140A INVERTER MIG WELDER

Cutting edge Inverter IGBT Technology helps you weld like a pro on home, workshop and on-site projects

- Latest inverter technology for silky smooth welding performance
- Compact, lightweight design – only 5.6kg!
- 140A welding power for up to 4mm steel thickness
- Gasless welding machine – for improved convenience
- LED Display for instant feedback of amperage and voltage
- Suits 0.8mm flux cored MIG wire
- Includes hand-held welding mask, chipping hammer and work clamps

Dimensions: (L x W x H)	345x145x265
Weight:	5.6Kg
Input Power:	230V 10A
Max. Input Current:	25A
Generator Capacity:	7.6KVA

MIG Duty Cycle:	120A @ 60%
Wire Size	0.8mm Flux-cored
Spool Size	Mini-spool 1kg
Drive Rollers	0.6/0.8mm knurled drive roller

**INCLUDES
TRB14 MIG
Torch**

With 10A Plug - Perfect for home or workshop power supply!
