

FIELD GOAL

Your team needs you to blast the game winning field goal! It won't be easy; blasting at even the slightest incorrect angle will send the block flying in the wrong direction. No pressure... but time is running out, and the game is on the line. You got this!

1) BUILD IT

<p>1</p> <p>— = connect it</p>	<p>2</p>	<p>3</p> <p>For tighter connections, briefly squeeze the connection points together (until they touch) before assembling.</p>
<p>4</p>	<p>5</p> <p>↓ = place it</p>	

2) BLAST THE BLOCK THROUGH

EXTRA CHALLENGES:

- How many can you blast through in a row without missing?
- How far back can you move the goal posts and still blast one through?
- How far back can you get from the ball (block) and still blast it through?
