

**BLASTER
BLOCKS**

KUBB

To win this ancient Viking game, knock over your opponent's blocks, and then knock over the king in the middle. But be careful: you lose if you knock over the king before all of your opponent's blocks are blasted.

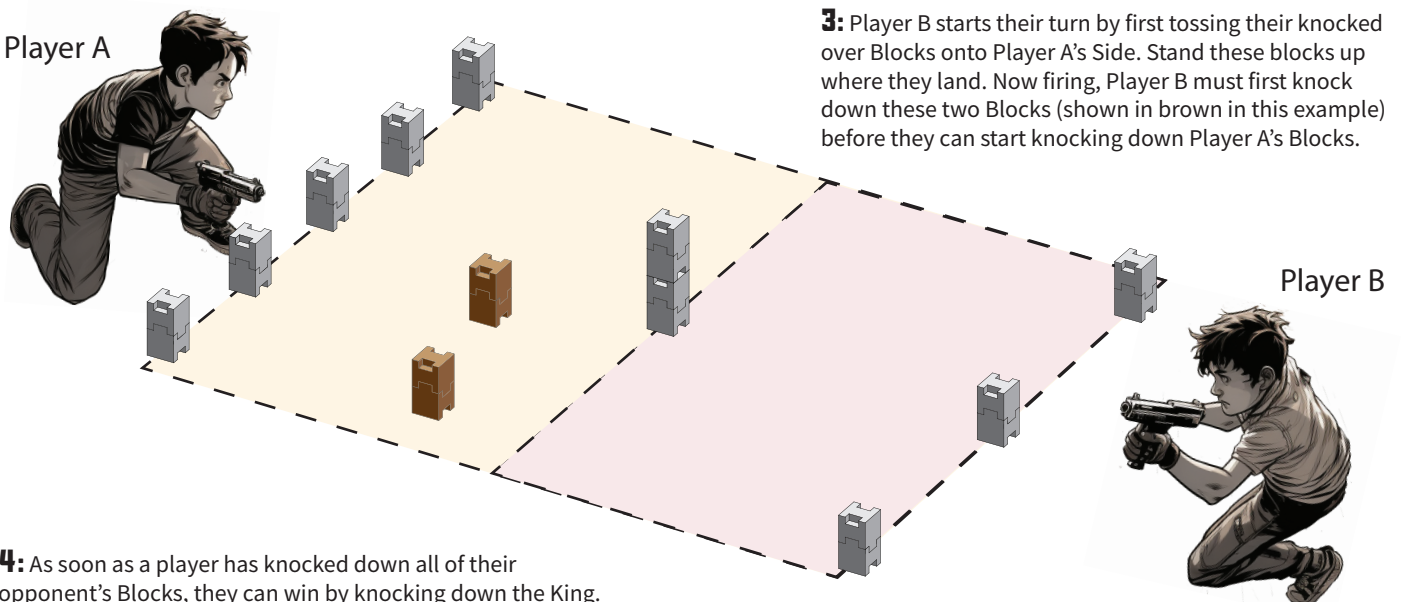

Player A

1: Start by marking out a playing area (you can mark out each corner with an edge piece). Setup five Big Blocks on each side, and a King in the middle (two Big Blocks stacked on each other).

2: Each player fires 3 darts per turn. In this example, Player A starts first and hits two of Player B's Blocks (shown in brown).

Player A

3: Player B starts their turn by first tossing their knocked over Blocks onto Player A's Side. Stand these blocks up where they land. Now firing, Player B must first knock down these two Blocks (shown in brown in this example) before they can start knocking down Player A's Blocks.

4: As soon as a player has knocked down all of their opponent's Blocks, they can win by knocking down the King.
