ABOUT US

Adventure Systems specializes in the design, construction, inspection, and maintenance of all kinds of experimental training facilities. Adventure Systems offers a wide range of unique products which cater to clientele from a wide range of industries.

Adventure Systems is registered with EPPU under the category of S10 (Sport), with a financial grade of S4. In addition, the company is also registered with BCA under the category of General Building, with a financial grade of C3, and GB 2.

As a Professional Vendor Member of the Association for Challenge Course Technology (ACCT) and a member of the Professional Rope Course Association (PRCA), Adventure Systems ensures all its products and services meet or exceed the standards set by these associations.

Rooted in its core values, Adventure Systems stands for top workmanship and quality, not only with regards to materials but also in any building or construction process, and customer service. Thanks to these strong beliefs in providing excellent products and services, Adventure Systems has obtained the Quality Assurance Standard, ISO 9001:2008, the Occupational Health and Safety Management Standard, OHSAS 18001:2007, and the WSC BizSafe Star certifications.

Our Services

Safety is our business. The fact that gravity kills, is ingrained in the minds of our trusted team of professional inspectors and they understand the importance of the health of any experimental training facility, giving their best in ensuring your facility is safe for use.

We offer inspection and maintenance services for all types of adventure and experimental facilities. Our clients include the Singapore Armed Forces (SAF), Outward Bound Singapore (OBS), and National Community Leadership Institute (NACLI), amongst many others.

Entrust your facility to us and have a peace of mind.

Our Products

Adventure Systems carry an ever expanding range of products. These range from sport climbing equipment, rope access equipment, personal protective equipment, and different climbing systems such as continuous belay and auto belay systems.

We are also the sole distributor for the world renowned Pyramide Climbing Wall from France.

Contact us to enquire more about the products available.

Pyramide Climbing Walls

The Pyramide climbing wall is a fully adjustable wall system that allows you to extend the overhang and adjust the difficulty level for the climber. It can be dismantled and shifted, expanded and shortened to suit the ever-changing needs of the operator. Pyramide walls are the only walls that allow complete

versatility in reconfiguring the profile of the wall without major changes to the structural system. This system allows the wall to be expanded or re-sited without having to replace the structural system. In short, it is a live wall. We are the sole distributor in Singapore for the world-renowned Pyramide wall from France.

Aquaclimb Walls

The Aqua Climb wall are walls which are installed at the edge of pools or bodies of water. This allows the fusion of water and climbing activities. The walls are specially designed for wet hands and feet.

Continuous Belay System

ZAZA for children

ZAZA PLI
Intermediate plate
Fixing on cables ø10 o ø12

save on insurance costs thanks to the BEST CLASSIFICATION "E" IN THE INCOMING PAH NORMS

ZAZA PLT
Plate for Tyrolenne
Fixing on cables ø12

ZAZA CS

ZAZA2 PLS3
Suspension plate
available in various sizes for
different length of Tyrolenne
up to 30m

ZAZA2 CS
Safety hook
Fast opening system for evacuation
Made in stainless steel ø14
Weight 300g

ZAZA2 CLE
Safety key for the opening
of the hook

ZAZA2 PAIG
Exchange plate for escape routes
or bifurcations

ZAZA2 ANSV
Vertical jump ring
For lina, skateboard and all the
others games where the
disconnection from the lifeline
is needed.
It allows to stay in complete safety
with a simple and intuitive system

HOW IT WORKS?
the principle of operation
is very simple: the hook of the
cable is smaller than the diameter of the cable
but greater than the thickness
of the plates.
In this way the safety is guaranteed,
once you enter the lifeline is impossible
to get out before the end of the course.
Only by a special key
supplied to the manager of the park
is it possible to unlock the sleeve
and then make evacuations in case of
illness, storm, fire, etc. ...

Thanks to the various components
it is possible to secure all
steps and various games of your
the park.

Coudou Pro system will allow you
to save on security personnel costs

Toppas Auto Belay

Toppas is a fully automatic, certified safety device which serves as a substitute climbing partner, ensuring your safety while providing a professional training experience. It allows a slowed down descent of 1 meter per second to the ground or any given point, and the two independent built-in brake systems means maximum safety is ensured.

Other Products

We sell and use specialist equipment, such as safety harnesses, karabiners, and safety helmets, from renowned suppliers such as Yates (USA), Robertson Mountaineering (USA), Kong Climbing products (Italy), Climbing Technology (Italy), and Toppas Auto belay (Germany). We believe in, and only offer you the best goods in the market.

Visit our website to find the full range of goods we carry.

Testimonials

Outward Bound Singapore's safety standards were exceeded by Adventure Systems during the construction of the training facilities in camp 1. They are highly innovative and have done outstanding work for us in the past 17 years.

**LIEUTENANT COLONEL (NS) WINSTON LIM, DIRECTOR, OUTWARD
BOUND SINGAPORE**

We would like to commend you on your good performance in completing the project smoothly and professionally despite facing initial difficulties. We would also like to take this opportunity to commend your company's professionalism in our external inspection and maintenance of all the adventure training facilities and rock climbing walls for all Outward Bound Singapore Campuses from 1 December 2004 to 4 October 2006.

LENG CHIN BENG, ACTING DIRECTOR, OUTWARD BOUND SINGAPORE

We are very pleased by the professionalism and commitment of the staff and management in providing quality services regardless of the project. It is evident that Adventure Systems would go the extra mile in providing suggestions on the advantages and its limitations on the scope of work.

**ROYSTON R., SENIOR MANAGER, QUEBEC LEISURE INTERNATIONAL PTE
LTD**
