# Summer Casualty: Even Toned Skin!

Ah.... September, pumpkin spiced everything, no more beach, no more pool, and it's getting dark at 7. If you're a fan of summer, this is a sad time of year. Time to put away the beach bags and bikini and pull out the sweaters and jeans.

There's another by product of the changing season. Your tan starts to fade. You lose that golden, rich glow. Your natural skin tone is revealed.

*However, after a full summer of being in the sun, there's a surprise left behind on your skin - tiny little brown spots.*

Yes, there are brown spots on your nose, on your cheeks and possibly even your chest. If you did a lot of waxing and shaving this summer to keep yourself smooth and sexy for that bikini, you may even be dealing with some dark spots on your legs and bikini line that have come out after a few ingrown hairs.

Even toned skin is a casualty of summer. Summer is gone and now all you're left with is uneven skin tone and a pumpkin spiced latte.

*Don't Stress! We have an easy and simple solution that is easy as 1 - 2 - 3.*

## **PFB Fall 3 Step Solution For Sexy Skin!**

### **Step 1 PFB + CHROMABRIGHT**

Be sure to use this elegant roll on product daily. Apply it to any area that you shave or wax. This product will eliminate any ingrown hairs AND it will slowly brighten any dark spots in as little as 8 weeks.

### **Step 2 Liquid Luffa Scrub**

This is an amazing exfoliating scrub. Dual action - meaning - there is a chemical (Alpha Hydroxy Acid) exfoliant and a manual

(crushed walnut shell) scrub. This will help to scrub away dark spots on a regular basis.

### **Step 3 Lumen8 Lotion**

This ultra moisturizing lotion that is ideal for any skin type contains CHROMABRIGHT which is clinically proven to lighten dark spots in as little as 8 weeks, if used daily.

Don't let Fall, get you down. Grab a sweater and enjoy the brisk fall weather. You can be sure to have glowing skin all winter long if you use the PFB 3 Step Solution For Sexy Skin! You'll have skin that is nourished, healthy and even toned!

## **New Marketing Ideas for the Lumen8 in conjunction with the PFB+Chromabright.**

Use the PFB Vanish + Chromabright daily either in the morning or at night. Also apply the **Lumen8 lotion with Chromabright** 2 times daily to moisturize and even out skin tone, it's vital that you use a tyrosinase inhibitor that will help to lighten the dark spots on the skin. These dark spots are a result of trauma to the skin, UV exposure or other factors. After the skin is exfoliated with the PFB+Chromabright, the newer skin cells may be less hyperpigmented. Therefore the steps to treat new skin cells with a product that will work to even the tone by targeting the darker skin cells and working to even out the tone is to use 2 times daily the **Lumen8 Lotion: With Chromabright** – results will visibly reverse the appearance of dark spots, melasma, post acne scars and sun damage, in 4-6 weeks. Use on face, chest and top of hands.

This simple 2 step duo that takes literally 3 minutes to complete can change your skin tone. Use this 2 Step system daily to see results in no time. Enjoy smooth, even tones skin in a matter of weeks.

## **Boost Service & Retail Sales With Dual Exfoliation**

If you're looking for something new and exciting to offer your clients this fall and winter, that will increase both your treatment revenues and your retail sales, we have just the solution - create a seasonal special peel. You can offer a dual action Walnut Powder Scrub Fruit/Glycolic Acid Facial Peel that can be added it into an appropriate facial. You can also educate your client how using a dual exfoliation product on a regular basis at home can help them have fresh, glowing skin regularly. Easily offer this treatment with an all in one product. **Liquid Luffa Scrub** is ideal for use in treatment and retail sales.

We reached out to one of our biggest fans, Julio Mendez of **WaxMan Spa** in Chicago to talk to us about the services and products he sells at WaxMan Spa.

**“PFB Vanish makes a remarkable product for exfoliation called Liquid Luffa Scrub, that eliminates guesswork and extra cost with a synergistic blend of physical and chemical ingredients for a TRUE dual-exfoliation product. Using beneficial and proven ingredients such as Glycolic Acid, Papaya Fruit Acid and Walnut Powder for a professional in-spa treatment or home regimen.**

**In our modern fast paced knowledgeable savvy world, a successful professional esthetician must learn how to customize every aspect of the client experience to deliver the short and long-term results you both are looking for. Liquid Luffa is a true dual-exfoliating product that saves time, money and delivers professional results. “ Julio Mendez**

Julio has found success by incorporating **Liquid Luffa Scrub** into his professional treatments and by offering it at retail to his clients for use at home. We asked him to tell us about this.

**“As a spa owner I have had employees that hate to sell product. There are countless articles and classes to teach sales and how crucial it is to run a thriving business with repeat clientele. In my opinion, a 2-in-1 product makes it much easier for my employees to offer our clients. Who wouldn't feel more confident offering two products for the price of one without compromising professional results?” Julio Mendez**

You can feel confident offering this dual exfoliation scrub to your clients. Allow your clients to enjoy the benefits of the manual scrub and chemical exfoliation during one of your skincare treatments and then send them home with Liquid **Luffa** Scrub to continue the great benefits. Every time your clients look in the mirror they will think of you and how you've helped them look so radiant.

# System That Really Works!

PFB Vanish™ has created a revolutionary 2 Step System for skin brightening and dark spot correcting. See a visible difference in as little as 30 days! (compared to 60-90 days with other brands)

1

Exfoliate

Liquid Luffa is a revolutionary face and body scrub to finely remove dead skin cells.

2

Lighten

Lumeng8 lotion lightens and brightens skin discolorations.

*PFB Vanish, Inc. announces launch Triple Action post hair removal product.*

### **ULTRA™ by PFB Vanish Corrects, Heals, and Brightens Skin**

San Rafael, CA, January 22nd, 2018. PFB Vanish Inc. has announced the launch of the ultimate triple-action solution for ingrown hairs, razor bumps and dark spots associated with hair removal. This new formula is enhanced with antioxidant power to provide even more brightening and protective properties, becoming your ultimate anti-aging body care product. It will provide anti-inflammatory effects, promote healing of burns, and regulate the pH of skin; all critical features of a post-hair removal serum.

"This new formula is the new 4-in-1 treatment product," commented Ottmar Stubler, President of PFB Vanish. "We saw the need to address *all* issues associated with post-hair removal treatments in the convenient, roll-on applicator that we are known for. By enhancing our existing formulas with additional lightening, soothing, and antioxidant rich ingredients, we saw amazing results!"

ULTRA™ by PFB Vanish has stronger protective, moisturizing and regenerating effects on the skin, and an enhanced ability to correct, brighten and protect from skin imperfections with four powerful skin lightening ingredients: shiitake mushroom, white water lily flower, plankton extract, and Chromabright. The convenient, soothing, roll-on applicator is ideal for use on any area of the body. This is a powerful anti-aging, antioxidant loaded formula formulated to address even the most troublesome hair growth.

PFB Vanish will continue to offer the full line of products: PFB Original Serum, PFB with Chromabright™, Liquid Luffa Scrub, Lumen8 Lotion, Bikini Mask, Man Mask, and Skini Cream.
