

**fujisprayTAN™** has been the leading manufacturer of HVLP Tanning Turbine Systems for over 20 years.

The miniTAN PLATINUM™ Series is the perfect choice for the mobile crowd. These miniTAN PLATINUM™ Turbines are not as quiet as the salonTAN PLATINUM™ Turbines but are still 1/2 the noise level of any standard turbine. All other features are the same.

The **miniTAN PLATINUM™ Turbine** is powered by a 2-stage motor that is specially balanced for the spray tanning industry. The all metal case features a durable textured finish. This Turbine will cater to all of your spray tanning needs from small touch-ups to lengthy sessions. It comes installed with washable and replaceable air filters and has a reset safety switch. Included with the Turbine is a gun holder bracket to conveniently rest the Applicator when not in use. It provides the strength and durability to meet the demands of a high volume spa or mobile tan business and is designed for both the salon use and the on-the-go technician. The miniTAN PLATINUM™ Turbine means spraying with confidence allowing you to focus more on your business success.

### **What's new in the miniTAN PLATINUM™ Series?**

#### **The Fuji Spray Heat Dissipation Box™**

Fuji Spray has designed a unique method of removing any heat build up from the Turbine case. Excess heat is channeled to a Heat Dissipation Box™ located at the rear of the case.

Because the hot air is dissipated evenly through an optimum surface area with 60 holes, there is no added hiss or loud whistling noise. There is also no blowing around of dust.

The benefits of a cooler running unit results in a longer life for your turbine motor compared to standard turbines.

#### **Fuji Spray Noise Reduction Covers™**

The Mini-Mite™ PLATINUM Turbines are equipped with a method to reduce noise. The Noise Reduction Covers™ house the Filters. Ambient air is entrained only from the rear effectively removing any Direct Sound Paths. Air is drawn in through a large Rear Aperture and through specially designed 'Finger Slots' for optimum performance.

## 2100 miniTAN PLATINUM™ M-Model

Included in every system...

The miniTAN PLATINUM™ Turbine, TAN7350 Applicator with **250cc** Cup (holds 8oz of solution), 10ft lightweight whip hose with quick connect, a convenient applicator holder on the turbine, user manual, wrench, and cleaning brush.

The portable and affordable 2100mini™ system is a combination of the smallest and most powerful system on the market. This model includes the all metal TAN7350 bleeder applicator that makes spray tanning a breeze.

The TAN7350 is a bleed style applicator. This professional grade applicator is sleek and durable. It features an adjustable Pattern Control knob located on the back just above the fluid knob. This allows you to easily change the Fan Pattern from wide to narrow. Maintenance is as easy as 1-2-3. This popular model will help you achieve impeccable results each time.

## 4100 miniTAN PLATINUM™ T-PRO

Included in every system...

The miniTAN PLATINUM™ Turbine, T-PRO™ Applicator with 75cc Gravity Teflon Coated Cup (holds 3oz of solution), 10ft lightweight whip hose with quick connect, a convenient gun holder on the turbine, user manual, wrench, and cleaning brush.

The portable and affordable 4100miniTAN™ system is a combination of the smallest and most powerful on the market. This system includes the light-weight sexy design of the T-PRO™ applicator with gravity feed teflon coated cup. This powerful turbine was designed to increase productivity and efficiency with an amazing spray tanning experience.

## **T-PRO™**

The T-PRO™ Applicator is elegant and sleek in appearance. There is nothing quite like it. This high quality professional non-bleed applicator is intended to spray for hours on end. Equipped with a unique center mounted 3oz Teflon coated cup for better balance. The T-PRO™ is 20% lighter for easy maneuvering and less fatigue for the user. An exclusive side mounted Fan Adjusting Control located at your fingertips. Aircap head has been specifically designed for this Tanning Applicator. Other features include stainless steel fluid components, adjustable fluid control, easy pull trigger and ergonomic Stay Cool Handle™. Excellence in Canadian Technology.

Clearly, this elegant designed spraying system will conform to all of your spray tanning needs, promoting its versatility and portability.

### **Key Features for the miniTAN™ System:**

**hvlpTAN™** powered by fujisprayTAN™ introduces two new light and mobile systems that will provide a skillful application of tanning solution products.

With hvlpTAN™ Spray Tanning Systems you will be able to accomplish a flawless tan without any effort. The hvlpTAN™ series are easy to use and designed to apply tanning solutions evenly and efficiently.

The hvlpTAN™ turbine is lightweight and durable with a 450 watt motor and built with a breaker switch located at the bottom on the turbine, a safety feature not found on most turbines of this class.

Portable and reliable this turbine is easy to use anywhere; at home, on the road, in a salon or at a show.

Two models are available, the **hvlpTAN LITE™** and the **hvlpTAN GLO™**.

The powerful **hvlpTAN™ Turbine** is a combination of convenience, durability, and power. Weighing only 4.2 pounds, this portable feather light yet durable machine is a star performer. In addition to its high impact resistant case, it has an applicator holder slot to conveniently rest the applicator when not in use. It comes installed with a washable and replaceable air intake filter plus a reset safety switch. It is easy to operate, transforming you into a professional almost instantly. You can always rely on the optimal performance of the hvlpTAN™ Turbine.

Please note that these hvlpTAN™ Turbines must be used with bleeder style applicators.

**3400 hvlpTAN LITE™**

Light and Compact! Perfect for those just starting out!

Equipped with the following:

- hvlpTAN™ Turbine
- 10 ft Air Hose with quick connect
- TAN7400 Applicator with **300cc** cup, holds 10oz of solution
- Extra Intake Turbine Filter
- Power Cord
- Instruction Manual

The **hvlpTAN LITE™** system is easy to use, combined with affordability and outstanding performance. It is a must own for a wide variety of uses from the small business entrepreneur, tan technician on-the-go, or home user.

This feather light and portable system will let you achieve the professional results you are looking for. It will make any user look like a pro.

The attractively designed TAN7400 applicator has stainless steel fluid components, adjustable spray pattern and adjustable fluid control. This gives the user full command and a relaxing worry-free spraying experience. The handle of the TAN7400 is a comfort grip handle, which stays cool to the touch even when spraying for lengthy sessions. Cleaning and maintenance after every use has never been simpler. You will achieve efficiency and productivity in no time. The applicator is built to continuously blow air even if the trigger is released. Easy attachment to the air hose with a quick connect fitting.

## 3350 hvlpTAN GLO™

Light and Sleek! Ideal for the continuous Mobile or Salon use!

Equipped with the following:

- hvlpTAN Turbine
- 10ft Air Hose with quick connect
- TAN7350 Applicator with **250cc** cup, holds 8oz of solution
- Extra Intake Turbine Filter
- Power Cord
- Instruction Manual

The **hvlpTAN GLO™** is ready to go anywhere at anytime. This compact all-in-one design caters to a variety of needs from the small business entrepreneur, tan technician on-the-go, or the home user. If you are looking for the best Spray Tanning System with an affordable budget, then look no further!

This innovative feather light and portable system allows the user to accomplish professional results with ease and efficiency. By making evenly and accurately blended layers the results are flawless.

The beautifully crafted TAN7350 applicator is built to last. The body of the applicator is all metal with stainless steel fluid components, adjustable spray pattern knob, and adjustable fluid control. This applicator has been designed to last for many years and you can count on its optimal and reliable performance every time. The TAN7350 sports an ergonomic Stay Cool Handle™ that remains cool to the touch even when spraying for

lengthy sessions. The applicator is built to continuously blow air even if the trigger is released. Easy to attach to the air hose with a quick connect fitting. The TAN7350 applicator together with its perfect balance and sleek design, make it without a doubt a leader in the spray tan world.

**Key Features for the hvlpTAN™ Series:**
