Getting Equipped

WRITTEN BY JENNIFER BARNES

▲ LASERCOMB PROFESSIONAL 12

This [HairMax](#) handheld device uses low-level laser light to stimulate hair follicles and promote growth without serious side effects. It is FDA-cleared and features 12 laser modules, a built-in rechargeable battery, and an ergonomic design. [www.hairmax.com](#)

▲ META-JECT FX50

The [Dermatude](#) device features a lightweight handpiece with curved needle head to provide customized anti-aging treatments without surgery. It creates microperforations in the skin of the face, neck, and décolleté using ultra-thin needles that inject vitamin-enriched serums. [www.dermatude.com](#)

▶ MEGAPEEL EX MICRODERMABRASION

This redesigned microdermabrasion device from [DermaMed Solutions](#) easily converts between crystal and diamond tip customized treatments. Both provide a non-invasive way to restore a more youthful appearance. [www.dermamedsolutions.com](#)

▼ ULTRASONIC SKIN SCRUBBER

The Ultrasonic Skin Scrubber by [Advanced Rejuvenating Concepts](#) can be used for a variety of treatments and skin concerns. It uses three distinct modes to exfoliate the skin, penetrate topical ingredients, and stimulate lymphatic drainage. [www.arcskincare.com](#)

◀ ULTIMATE 160 BEH

The sleek, black-hooded laser from [HairLoss Control Clinic](#) features a rolling stand that enables flexible treatment. The hood houses 160 laser diodes for maximum coverage to help regrow hair on the head. [www.hlcconline.com](#)

▶ SIMPLICITY

Featuring a compact design and foot-switch operation, the [Nouveau Contour](#) Simplicity is a portable permanent cosmetics device that works well for an on-the-go technician. The device allows for easy application of permanent color for eyebrows, eyeliner, and lips. [www.nouveaucontour.com](#)
