These *barrier-free shower pans* are manufactured so there is no raised “wall” as users enter the shower. Instead, the one-piece unit is slightly pitched so that all water runs downward toward the

drain. This eliminates water running over onto the bathroom floor, minimizes ponding in the shower, and reduces slip-and-fall hazards. Additionally, the shower pans provide freedom to wheelchair users, allowing them to wheel directly into the shower with no bumps or obstacles. 800.232.6156.
