

INTERPRETING THE RESULTS

? 1. What patterns, if any, can you identify from your graphs?

? 2. What can you say about any changes in the path of the Sun across the sky from one month to the next (Graph 1)?

? 3. What can you say about any changes in the angular height of the Sun around noon from one week to the next (Graph 2)?

? 4. What relationship, if any, can you identify between the seasons and the Sun's angular height at noon?

What I know about the changing path of the Sun across the sky
