Blackboard Paint

BLACKBOARD PAINT FROM MAG PAINT: PAINT WITH A TOUCH OF NOSTALGIA!

Blackboards are not only nostalgic; they have also become very fashionable again! For those who want to do something different with their interior decor, BLACKBOARD PAINT is the solution.

AT HOME

Leave a note? Make a shopping list? Or just be all creative with chalk? A blackboard area in the home is both functional and fun.

BLACKBOARD PAINT can be applied anywhere. Turn a door into a message board or make a blackboard wall in your bedroom. The possibilities are endless so be creative!

FOR KIDS

Give children a pack of chalks and a blank blackboard wall and you will be amazed by what they create! A blackboard is an open invitation; it stimulates the imagination and curiosity. With chalks in hand, children can let their imagination run wild. Success is guaranteed.

CHOICE OF COLOURS

A magnificent blackboard wall is also suitable for schools, associations, cultural and health care institutions. Did you think a blackboard has to be always black? Not with MagPaint's BLACKBOARD PAINT! It is available in lime, pink, grey, black, dark green, blue and red.

APPLICATION

1. Clean the surface with a dry cloth. First, stir the paint thoroughly. After stirring, leave to stand for 5 minutes until most of the air bubbles have disappeared.
2. It is best to apply blackboard paint diagonally, with a short nap

paint roller, the type used for acrylic paint. Two to three coats of paint may be required depending on the existing surface material and colour (0.5L per 5 m²) In the case of untreated wood, iron, metal, plastic, etc., it is best to apply an undercoat or a primer. After 16 hours, the paint can be painted over and sanded.
ALL DONE!

BLACKBOARD PAINT
from MagPaint is available in
tins of 500 ml. and 1,000 ml.
