Wool Protection

IONIC PROTECT is now a protected trademark. ionic protect ®

IONIC PROTECT - new **biocide free** wool protection system.
Ecological, sustainable and **durability** proven!

The procedure treats the wool fibre in a **plasma-ionic** way aiming to protect it against all the negative influences of the building environment.

IONIC PROTECT by ISOLENA protects and sustains sheepwool insulation, acting as a natural moth repellent, it prevents the fibre from **being** eaten.

The performance of IONIC PROTECT has been checked and confirmed by an independent laboratory (CUAP test).

A new milestone permanently improving the quality of our **100% Pure SheepWool insulation product.**

 **IONIC PROTECT®**, the new,
innovative wool protection

is the most useful invention since virgin sheep wool
to be used as insulation protection. Biocide-free,
permanent and CUAP tested.
