DETAILED DESCRIPTION

JAPAN MADE NEEDLES

High quality stainless
surgical steel

UNIQUE JCONLY LOGO

Can better distinguish
other brands

SAFETY MEMBRANE DESIGN

3 layers membrane
design, more flexible

NON-SLIP RIP DESIGN

Adjust the
cartridges stably

INTERNAL STABILIZER

Avoid the needle
from shaking

PERFECTLY FIT PEN

Compatible with all
tattoo pen machines

ADVANTAGES

1 PROTECTIVE SOFT MEMBRANE

Prevents the liquids leaking into your tattoo machine. Stabilize the needle inside and improve more precision to support top-end tattoos.

2 INTERNAL STABILIZER DESIGN

The internal stabilizer design of the round Liner & round shader needle can make the needle more stable and higher efficiency for the line works.

3 INDIVIDUALLY DESIGNED TIP

The tip matches every needle size perfectly which improves stability and precision. The cartridges can perfectly draw in and distributed the ink.

4 MEDICAL PLASTIC SHELL

It does not wear during the needle stroke, so that no plastic element goes under the skin and prevent from skin inflammation. More safe for skin.

5 SHARP JAPAN-MADE NEEDLES

Can provide high precision. Do less harm to skin. Which means better results during the work and after healing. Hypoallergenic surgical steel.

6 SPECIAL BAFFLE DESIGN

The baffle design for magnum cartridges that just makes sure the needle more stable during the work for shading and large coloring without inkjet.

ADVANTAGES

SPECIAL VENT DESIGN

Special vent design will help the tattoo artists work more smoothly. In order to make the better ink flowing without any resistance. Will be suitable for any types of tattooing styles even tough the long season.

THREAD ANTI-SKID DESIGN

Unique thread anti-skid design on both sides is not only very convenient and easy when the artist is changing the single needle, but also It can make the tattoo artists feel more comfortable to hold the body of the cartridges then control.

ERGONOMIC BODY SHELL

The ergonomic body shell design is convenient and cozy for the fingers. The shape of the needle shell is designed according to artificial mechanics, and the holding posture is comfortable.

TIP AND NEEDLES

FUNNEL-SHAPED DESIGN

The round liner & shader needle adopts a funnel-shaped design, which stores more ink, and the ink discharge is very uniform, without ink jetting, you don't need to increase times to dip more ink for tattooing.

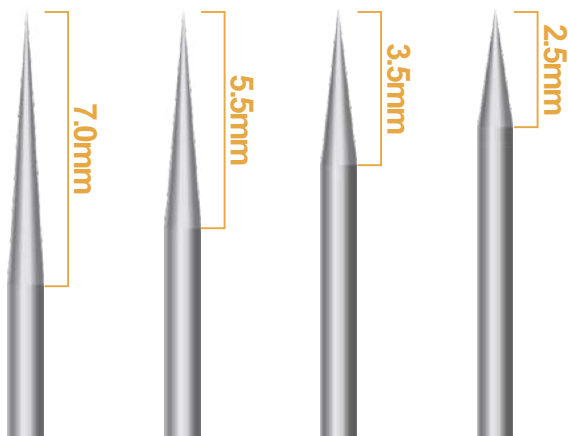

GENTLE SLOPE DESIGN

The magnum & curved magnum cartridge needles with gentle slope design, it can increase the ink storage and the open tip of magnum and curved magnum needle are easy to clean and fast coloring.

SPECIAL STIPPLE SHADER

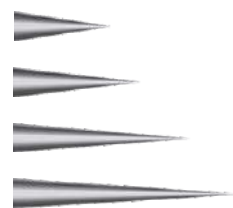

Specially designed with 3 groups, 4 groups, 5 groups and 6 groups of 3RL for dot shading. It can improve the efficiency of dot shading.
