

A Leap Ahead In Bag Sealing Technology

The Q600C is QuantumPak's continuous band sealer that can seal bags & pouches at speeds up to 600" per minute.

The Q600C's rugged design and stainless-steel construction will hermetically seal a wide variety of metalized, paper, Tyvek & other plastic materials and also a variety of bag styles. It is suitable for 24/7 operation in a wide range of demanding industries and with its standard 7" wide fully synchronized product conveyor, it can hold bags weighing up to 15 lbs. and up to 22" tall as standard.

The Q600C can seal pillow top or gusseted bags at speeds up to 20+ bags per minute.

The sealing process includes easy to use digital controls for the temperature and speed and can be adjusted to accommodate a wide variety of material, ensuring reliable seals.

Compare and see why QuantumPak is the best built bag sealer on the market today!

Compare And See Why The Q600C Is The Best Built Bag Sealer On The Market Today!

We build them better and here's why:

- We offer 6" heavy duty heating and cooling zones as standard. The longest in the industry. Allows you to run faster and use thicker bags.
- NO TOOL, 5 minute changeover on Teflon bands and even seal widths.
- We guard the seal section so you can monitor the seal belt while it is still guarded. This makes for easier and safer operation and maintenance.
- Easy to use/intuitive controls.

Intelligent. Expandable. Game Changing.

QuantumPak is a world class manufacturer of continuous band sealers. We offer a wide range of rugged bag sealers, many of which are in-stock, ready for immediate shipment. QuantumPak also provides custom engineered solutions for a wide variety of bagging applications and is a turn-key provider for pre-made bags, custom packaging films and associated bagging machinery.

FEATURES

- Max Speed (inches per minute)
- Standard frame is tall enough to handle a 22" tall bag
- Conveyor width
- Detachable seal module (allows for much faster changing of the seal bands or the seal widths)
- Simpler/Easy to use digital controls
- Extra Stainless Steel control box construction
- Crank wheel adjustment for easy height adjustment
- Spring Loaded pressure bars (better sealing pressure on thicker bags/gusseted bags)
- Scales & Robotic loading available
- USA manufactured controller & motors
- Can add Gas Flush capability in future
- Locking Heavy Duty Stainless Steel 4" dia. casters
- Stainless Steel Modular Frame
- Teflon and Kevlar seal bands
- Direct drive, no timing belts
