**THE INDUSTRY LEADER  
IN BROKEN BOLT REPAIR**

## EXPERIENCE THE PROMAXX® TOOL DIFFERENCE

ProMAXX® Tool opened the Exhaust Manifold Repair industry for on-the-truck repairs in 2010. Today, the company still leads the industry with the most EMR, broken bolt repair kits and other vehicle applications and accessories designed to make the most productive repairs, delivered with the highest precision.

ProMAXX® Tools are designed to deliver a fast return on investment in just the first or second use. ProMAXX Tool provides superior precision and alignment for perfect perpendicularity and spot-on center machining.

All our tools are designed to deliver results - stronger and better-than-factory repair. Most importantly, everything is made here in the USA, nearly all by ProMAXX®. This is why quality, productivity and precision are built into every tool that we design, engineer and manufacture right here in Pittsburgh, PA, USA.

*ProMAXX® Tool proudly supports our veterans. We are extending a discount to those who served in recognition of their patriotism and professionalism. Please contact a tool specialist at 724-941-0941 for more details.*

## FEATURED POWER STROKE & DURAMAX TOOLS

### FORD 6.7L POWER STROKE EGR MOUNT BOLT REPAIR

PMXN200PRO

- » Repairs broken Ford 6.7L Power Stroke EGR bolts
- » Turn eight hours of replacement time into a 60-minute repair
- » Easily cuts through titanium for on-the-truck repair

### FORD 6.7L POWER STROKE HOLD-DOWN BOLT REPAIR

PMXO200PRO

- » Saves more than 25 hours in repair time
- » Eliminates cylinder head and truck cab removal
- » Immediate ROI

## DURAMAX DIESEL

### DURAMAX 6.6L TURBO PEDESTAL REPAIR

PMXSDMX300PRO

- » Save up to four hours of shop time
- » Repairs the turbo charger pedestal to new condition
- » Limited Lifetime Warranty

### DURAMAX 6.6L EXHAUST MANIFOLD REPAIR

PMXT300PRO

- » Bolts to top or bottom for perfectly straight drilling
- » Remove broken studs in 15 minutes or less on average
- » Eliminate risk of drilling into coolant jacket

## REPAIR KITS FOR GENERAL MOTORS

# POWERTECH SETS

**POWERTECH SET** Exhaust Manifold Repair (EMR) Kits from ProMAXX<sup>®</sup> Tool includes jigs that allow techs to repair the most common engines from Ford, GM and Dodge. For exhaust manifold repair (EMR), ProMAXX<sup>®</sup> Tool uses precision threaded bushings while competitors use inferior and less expensive plates, clamps, or slip fit configurations. ProMAXX<sup>®</sup> Tool products are the most precisely made and accurate to deliver a fast return on investment.

# TOMMY WHEEL BEARING HUB PULLER

IS THE BEST AND THE FASTEST PULLER ON THE MARKET, HERE'S WHY:

*Engineered to remove the bearing like it was installed - straight on. The three unique heavy-duty push rods triangulate and distribute an incredible amount of force to pull the most stubborn, pressed-in wheel bearings straight-out without having to remove the knuckle or realign the vehicle.*

# ACCESSORIES FOR PULLING WHEEL BEARINGS

## Inner Bearing Extraction Plate

**PMXTPF415AC**

The Extraction plate is designed for use on the Subaru inner bearing in the event that the axle nut is accidentally removed prior to extraction.

## Tommy Axle

**PMXTOMAXL**

Searates the axle directly from the bearing on select Ford and Subaru models.

## Tommy Rail

ProMAXX® designed Tommy Rail to provide technicians with even more pulling power to address the most stubborn wheel bearings.

Tommy Rail generates more power through the pushrods to the knuckle, punching the wheel bearing straight off. Made from solid aluminium in the USA.

**PMXTMR100**

## High Pressure Lithium Greases

**PMXTOMGUNA**

A designated grease gun for Extreme-Pressure Lithium Grease. No more bleeding and mixing greases.

**PMXPPG001**

**PMXPPG016**

Required for the protection and operation of Tommy.

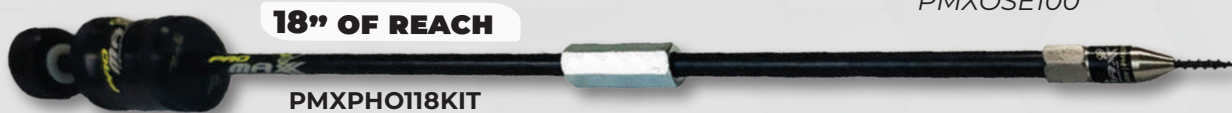

SEE THE TOMMY WHEEL BEARING PULLER IN ACTION BY SCANNING THE QR CODE ON THE LEFT.

# HORNET OIL SEAL EXTRACTOR

Oil Seal Extractor removes oil seals, plastic dip sticks, and glow plug seals, along w/ many other uses. Includes a unique, replaceable standard drywall screw for new tip.

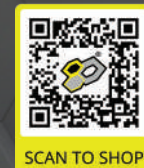

## PLIER · PULL

### PlierPull Locking Plier Adapter

Threaded connector for a Mini-Slide Hammer attachment. Three sizes and adapter for larger slide hammer. Perfect for when you need more pulling power.

PMXPPTMSTSET

ProTractor 10 screw extractor set with drill bits. (1/8"-11/32")

**DOES NOT DEFORM THE  
REMNANT OF BROKEN BOLT**

### PRODRILL GOLD MICRO-EDGE COBALT DRILL BITS

Drilling through extremely hard material including Titanium, Boron, Ultra-Strength, and even Stainless Steel is easy with ProMaxx Tool's premium gold drill (tooling) bits. Exceeds Aerospace Specifications.

PMXSSC125/188/266/270/420

### PRODRILL PLATINUM SUBMICRON GRAIN COBALT DRILL BITS

High-performance tooling bits engineered to cut through the hardest materials and drastically increase productivity. Excellent for drilling extremely hard materials including broken extractors and taps.

PMXPLT125/188/266/270/420

### PROTAP PREMIUM TAP FOR RESTORING THREADS

ProTaps are all machine-grade bottoming taps. We are able to provide this right off the start of tapping because the ProMAXX ProKits allow for the guide bushing to keep perfect alignment of the tap during the entire repair.

PMXPPT006/008/010/012

### PRODRILL COBALT PREMIUM THREADED DRILL BITS

ProMAXX PSSC drill bits have a proprietary fit into the holder, eliminating the inexpensive soldering that can delaminate and cause them to separate. Because these bits are turned out of cobalt steel, they are capable of cutting into extreme hard materials including Rc. 55.

PMXPSSC125/188/270/420

All of the platinum tooling is high-performance A-GR-SiV sub micron grain carbide. The tools are coated for lubricity and fast feed rates, even in hardened steel. Our line of platinum tooling can be used for extremely hard materials including broken extractors and taps. They are micro-point and double fluted. (140 degree point, 30 degree helix/-.0015" +.0000")
