

WHEEL BEARING PULLER TOMMY

QUALITY | PRODUCTIVITY | PRECISION

Tommy™ is engineered to remove the bearing like it was installed—straight. Its three unique heavy-duty pushrods triangulate and distribute an incredible amount of force to push the most stubborn, pressed-in wheel bearings straight-out without having to realign the vehicle.

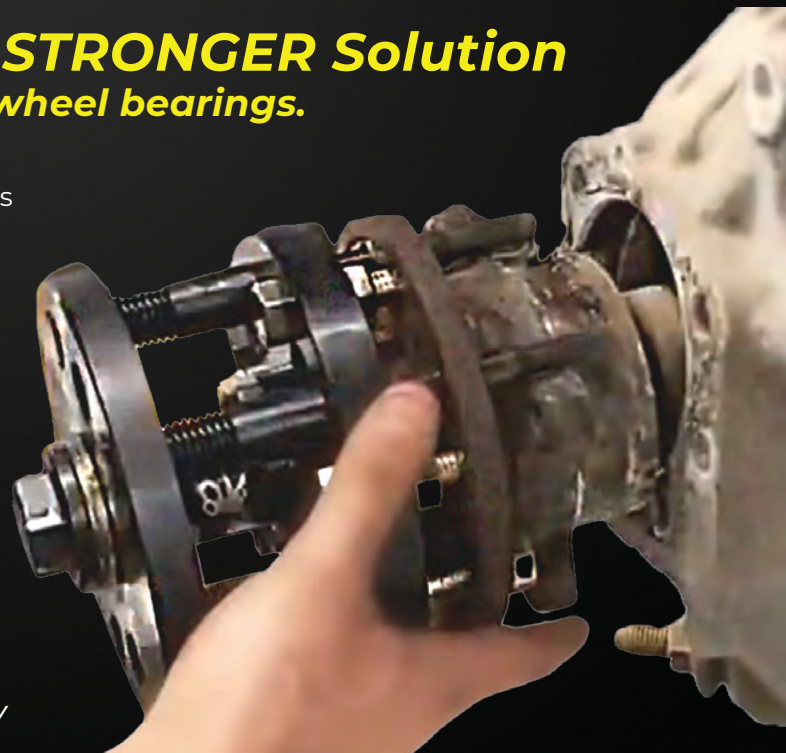

**Remove the most stubborn & seized wheel bearing hubs.
FAST... ProMAXX Fast!**

***The SAFER - FASTER - STRONGER Solution
for pulling seized wheel bearings.***

- ✓ Attaches to the Wheel Hub in MINUTES. Pulls the bearing in SECONDS.
- ✓ Eliminates removing the knuckle and realigning the rear/front end of the vehicle.
- ✓ Works on most Gen 2/3 Wheel Bearing Hubs.
- ✓ Made entirely in the USA.
