

This document gives step-by-step instructions on how to make your mouse left-handed on Chromebooks.

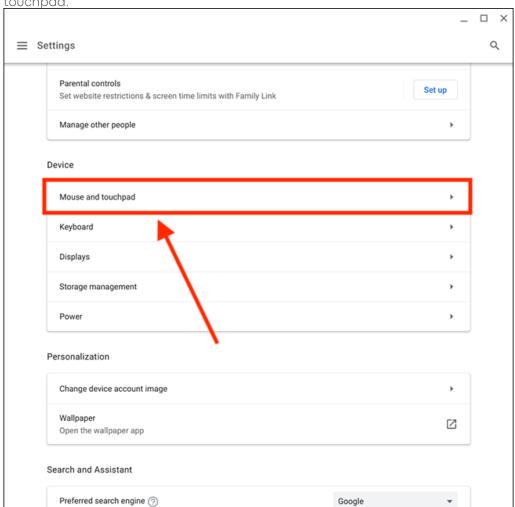

1. <u>Select the time in the bottom right cor</u>ner to open the System menu.

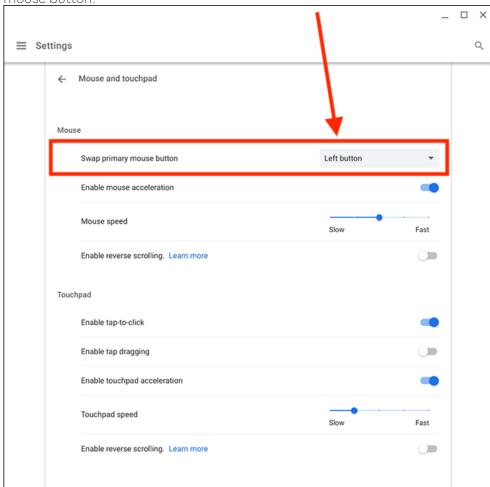

3. In the Settings window, scroll down to the Device section and select Mouse and touchpad.

4. On the Mouse and touchpad screen, select the drop-down menu for Swap primary mouse button.

Select Right button from the list.  $\square$   $\times$ Q ■ Settings ← Mouse and touchpad Mouse Left button Swap primary mouse button Left button Enable mouse acceleration Right button Mouse speed Fast Enable reverse scrolling. Learn more Touchpad Enable tap-to-click Enable tap dragging Enable touchpad acceleration Touchpad speed Fast Enable reverse scrolling. Learn more

Note: If this does not work it could be because someone else manages your computer settings (an IT department or administrator). If this is the case, you will need to contact them to access these settings or for further help.
