Quick-Start Guide to setting up
Scanning Remote.

1
**Make sure Scanning Remote battery
is charged or is powered from wall adapter.
Press Function to make sure the unit is awake.**
2
**Fill out the Configuration Chart
(overleaf) with your required button functions.**

3
**Pair each button with its receiver by pressing Pair on the receiver and
then BOTH Pair/Learn and the relevant touch button on Scanning Remote.**

4
**Once the 'P' appears on the display,
press any further buttons you may wish
to form part of the same pairing group.
You can add these until the P is extinguished.**

5
**Now set the function of each button by
pressing Function to select and
Pair/Learn to change.**
