#### **Quick Response within 12 Hours**

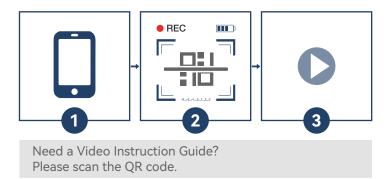

If you are still unable to resolve the issue you are experiencing, please contact us immediately at our support email. It doesn't matter if the product has been installed, our customer support team will respond within 12 hours and assist you quickly and efficiently.

The most efficient way to confirm your problem to us is to attach a video illustrating your product issue.

### **INSTALLATION VIDEO**

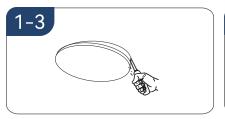

If the QR code is invalid, please contact us for the video.

04

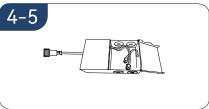

## HOW TO INSTALL

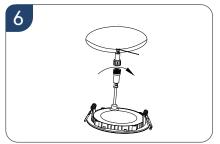

- Install the drywall directly over the rough-in paper. NOTE: It is suggested to use your own method in locating the center of the aperture hole.
- 2 Select your desired method of cutting either using a hand saw or hole saw to cut an opening in the ceiling by using the provided template.
- After selecting the desired method of cutting, cut out a 6.33" diameter hole in the mounting surface.

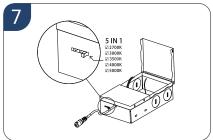

#### CAUTION:

Do NOT cut a hole that exceeds or that is larger than the paper opening.

- Make sure all POWER IS TURNED OFF at the electrical source to the location in which you are mounting the luminaire.
- Remove the cover of the provided J-BOX and insert wire nuts to make connections with power supply. Insert splices in J-BOX before concealing the cover.

Onnect the J-BOX to the light module.

7 Turn on the power and slide the CCT Selection Switch to test the light.

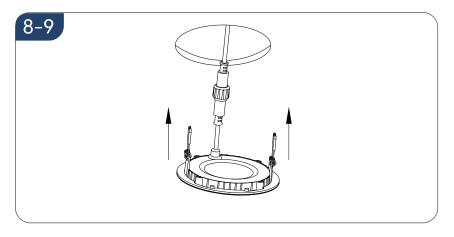

#### **BEFORE INSTALLATION:**

On the back of the J-BOX, slide the CCT Selection Switch and choose from five available color temperatures: 2,700K; 3,000K; 3,500K; 4,000K; and 5,000K.

- Test results from each CCT Selection to determine which brightness level suits your room best.
- The light will use the preferred setting whenever you turn on the switch.
- Turn off the light switch and continue with the installation.

## HOW TO INSTALL

B Place the J-BOX through the cut-out hole and mount according to your local electrical code compliance.

📀 Rotate and hold both spring clips upward to allow passage through the cut-out in the ceiling.

Continue to press the light module through the cut-out hole until it is securely fixed and flushed with the ceiling.

#### WARNING

- DO NOT turn on the switch until the light panel is properly connected to the junction box. Failure to turn on without securing the light panel and the J-BOX may result in PRODUCT DAMAGE and/or ELECTRIC SHOCK.
- RISK OF FIRE OR ELECTRIC SHOCK CONSULT WITH A QUALIFIED ELECTRICIAN TO ENSURE THE CORRECT BRANCH CI CONDUCTOR.
- RISK OF FIRE HAZARD MIN 90°C SUPPLY CONDUCTORS.
- DO NOT make or alter any open holes in an enclosure of wiring or electrical components during kit installation.
- To prevent wiring damage, puncture or abrasion, do not expose wiring to edges of sheet metal or other sharp objects.

#### SPECIFICATIONS

Voltage	120V
Wattage	12W
lumen	1050LM
Suitable for Locations Ingress	Wet location
Housing	Aluminum
Weight	0.86lbs
Warranty	5 years

### COMMON TROUBLESHOOTING

#### **PROBLEMS AND COUNTERMEASURES**

PROBLE	M > PROBABLE CAUSE	SOLUTION
Unlit	The wire falls off/loosens/breaks	Check that the wires are well connected
	The power switch is not turned on	Ensure that the power switch is on
	Voltage is too high, product is damaged	Ensure that the voltage is 120V
	None of the above	Reach out to our Customer Support
Dim	Incompatible dimmer	Check and choose a dimmer from the recommended dimmer list
	Not setting the dimmer right	Check dimmer Settings
	Too many lights are connected to one dimmer	Total Power Of the Lights≤ 75% of the Rated Power of the Dimmer
	The brightness of lighting is too low	Install more lights and recommended spacing for installation of 4" lights: 2-4ft, & 6" lights: 5-7ft
	The brightness of lighting is too high	Lower the dimmer or reduce the number of lights at the same time
	Mix the junction boxes (4" and 6")	Check if the junction box matches
	The product is not installed in place	Check the product installation steps to ensure that the springs and other parts are normal
	None of the above	Reach out to our Customer Support
Flickering	The wire falls off/loosens/breaks	Check that the wires are well connected
	Incompatible dimmer	Check and choose a dimmer from the recommended dimmer list
	Too many lights are connected to one dimmer	Total Power Of the Lights≤ 75% of the Rated Power of the Dimmer
	High-power electrical appliances on the same circuit	Reduce the number of lights at the same time
	Voltage is too low	Check the circuit voltage to make sure the voltage is 120V
	None of the above	Reach out to our Customer Support
Overheating	Too many lights are connected to one dimmer	Total Power Of the Lights≤ 75% of the Rated Power of the Dimmer
	None of the above	Reach out to our Customer Support
