

iPad/iPad Mini Wall Bracket installation and operation.

www.iPadWallBracket.com

The iPad Wall Bracket ("IWB") consists of two part, The front and back panels.

Secure Model

1. Use the wrench supplied to lock and unlock the IWB. Insert the wrench into the small screw at the side of the IWB and unlock by rotating it counter-clockwise until it stops.

2. Lift the front panel from the back panel from the same side as the screw. It will hinge up. Pull it out toward the same end you lift to completely separate the front panel from the back panel.

Do not use any excessive force in the process; the parts will easily separate once unlocked.

3. To attach the bracket to a wall or any other surface, use proper screws and dowels as needed. It should be capable to support at least 5lb (2.5Kg). At least four screws well spaced from each other should be used. Flat head screws should be used to maintain clearance from the back of the iPad. Any of the holes in the back panel can be used.

4. If a charger cable is required, connect it to the iPad. Carefully inset the iPad into the bracket at an angle, and push it flat into the bracket.

Keep holding the iPad securely!

iPad Wall Bracket

5. To close and lock reverse the opening procedure – at an angle slide the front panel into the back panel assuring the two tabs slide into location. Then push it back into place.

6. Lock them together by rotating the screw with the wrench clockwise until it stops.

There is no need to strongly tighten the screw, it is meant to provide a secured lock by reaching the stop with no

Magnet Latch models

Magnet Latch model follow a similar procedure, without the need to use the wrench.

1. Pull the front panel from the back panel from the right side with slight force to release the magnetic locking mechanism. Then lightly keep pulling the front panel and then slide it away from the back panel.

• **Do not use any excessive force in the process; the parts will**

Follow steps 3 and 4 above to attached the bracket and insert the iPad. **Keep holding the iPad securely!**

Slide the front panel back in and push into place. The magnetic latch will secure it in place. No further locking is required.
