

# HOW TO EXTEND THE LIFE OF YOUR SPA COVER

- 1. Check your chemical levels at least once a week, and do not allow them to exceed 'normal' readings on your test kit.**
2. Do not walk, jump, sit or lie on the spa cover at any time.
3. Do not drag or slide the cover when moving it. Instead, always lift and carry the cover.
4. Store the cover away from rough or abrasive surfaces, as these will cause wear and damage.
5. Rinse before storing for long periods.
6. Clean your cover using a mild soap detergent, and rinse well after cleaning. Do not scrub with harsh brushes or scouring pads.
7. Do not leave your Spa cover in direct sunlight when it is not in use, even for short periods of time.

*For detailed information about care and maintenance of your spa, you should refer to the manufacturers advice.*
