PRODUCT:

THE ULTIMATE SETUP

Fly High Wakeboarding Mfg. is the only company with a combination of products to give you the ultimate setup. There is no doubt that the Pro X Series line of Fat Sacs™ are the highest demanded ballast bags on the market due to their innovative design and bulletproof build. When combined with the Tsunami Pump and Quick Connect Fittings, these sacs fill faster than any other ballast bag money can buy. The fittings and their placement also make it easy to design your own integrated system; the possibilities are endless.

The Pro X Series Tower is the only stainless steel tower on the market making it the strongest and most durable tower money can buy. It's entirely universal so it will fit any boat whether you mount it on top of the gunnel or on the sides. The crossbars of the tower are padded and act as an integrated rack that will store everything from a slalom ski to wake surf board. Quick Release Pins make folding the Pro X Series Tower quick and simple, just pull six pins and the tower is collapsed to it's stowed position.

New for 2007 is the Fly High Pro X Series Tower Extension. This revolutionary product will help wakeboarders at all levels take tricks bigger and land softer. It also allows riders to learn inverts and spins at slower speeds. Trying to land that first Raley? With the Pro X Series Tower Extension you can slow the boat speed to 18 MPH, increasing confidence while reducing the punishment of crashing. It's easy to setup and collapses completely allowing you to keep your boat on the lift or in the garage when not in use. It's totally universal and will fit all tubular towers on the market. The pros who have tested the extension have nothing but praise for it.

The Tower Boom is the last piece of equipment you will need to round out the package. This boom attaches to any tubular tower and is extremely strong. After it has been installed, the Quick Release Pins make it easy to stow. The outside section of the boom telescopes in and the braces fold along the boom when raised.
