

Renzo® Classic

TGSI

Carpet System

Designed specifically with carpet and underlay applications in mind, the system's configurable base plate and ferrule heights allow for the installation of Tactile Ground Surface Indicators (TGSIs) on a diverse range of carpet and underlay combinations.

Where other systems can lead to uneven installations, the Korb system ensures uniformity of heights and centres, creating a visually pleasing and consistent environment. Furthermore, its robust design resists rotation and potential failure from loose tapping threads, ensuring its longevity matches the lifespan of your designs.

Designed exclusively for indoor use, Korb's Carpet System is the preferred choice for the integration of TGSIs into carpets with underlays. This system leads the industry in its aesthetic integration, practicality, adaptability, and durability.
