Living spaces made with clay

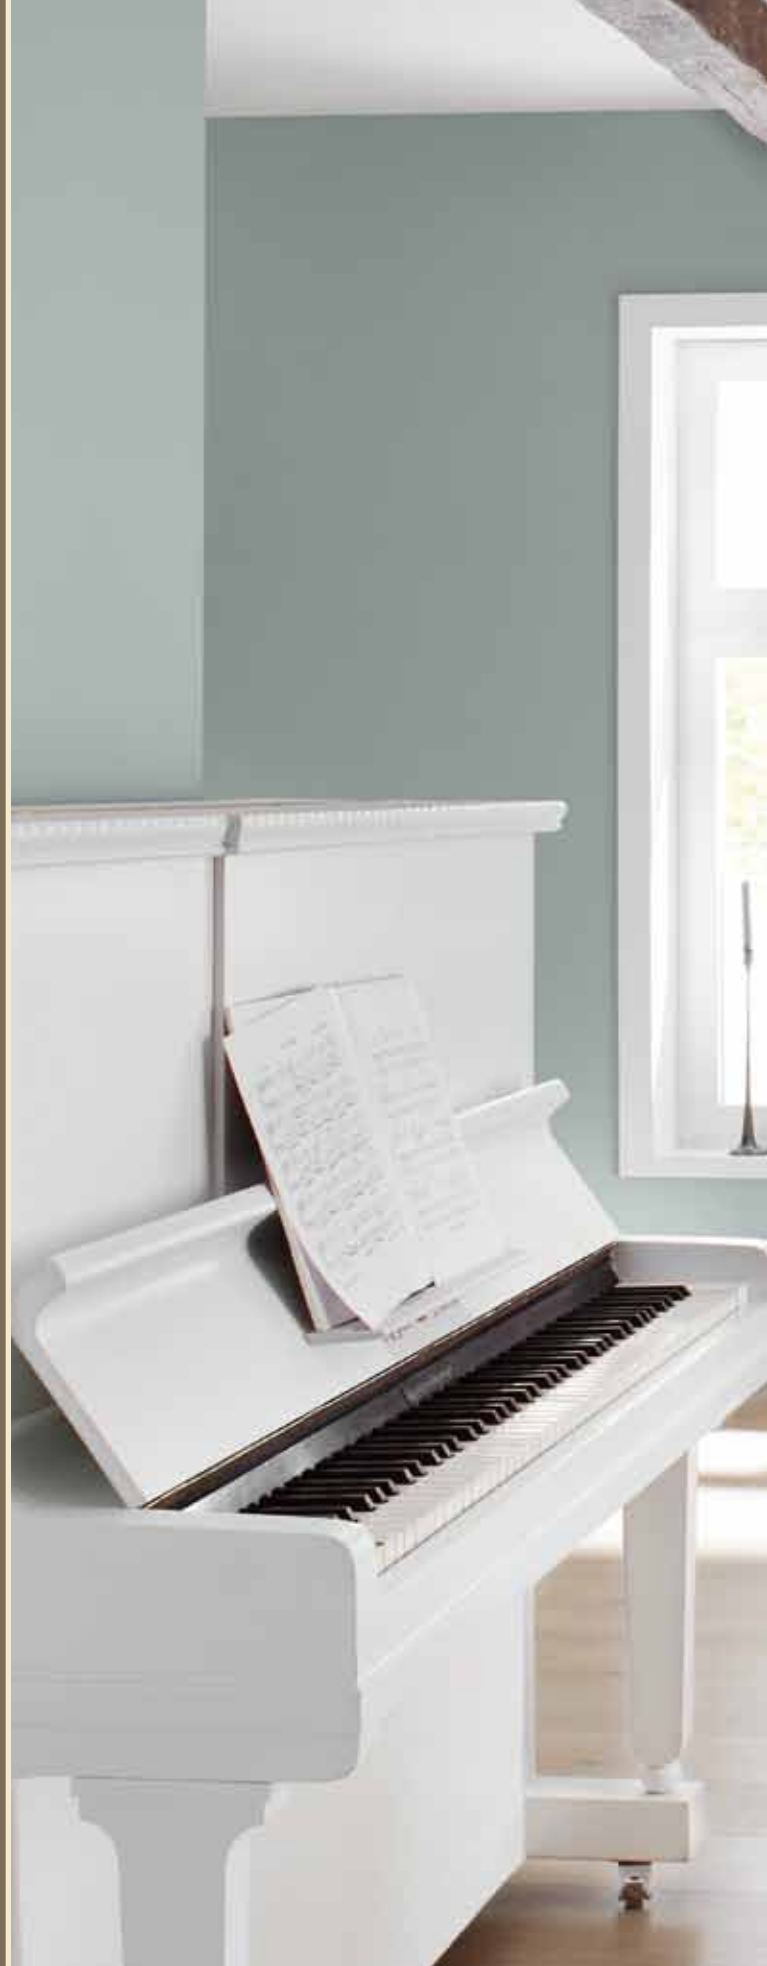

Comfort and aesthetics:

As a 100% natural product, conlino paint and plaster is pure in appearance, unmistakably authentic, and sustainable in its composition.

The conlino range of earth-based products unite comfort, health and aesthetics in an exceptional way. The evocative colours of the conlino range, made of selected coloured earths and clay minerals, lend interiors an atmosphere of warmth and character, and a unique sense of living comfort.

Drawing on our years of experience, we have created a refined blend of selected earths and clays from throughout Germany that exhibit incomparable depth and brilliance.

conlino products meet the highest ecological standards and aesthetic requirements: they are healthy, sustainable and have excellent humidity regulating properties.

Clay paint

conlino clay paints are a perfect choice for natural living environments. The resulting wall surfaces have an even, harmonious, matt appearance of excellent durability. The material's crystalline structure lends wall surfaces a finely nuanced finish. Clay paints are easy to work and cover well on almost all backgrounds. What's more, the conlino paints are entirely natural and contain no chemical additives or toxic substances.

Application: with a lambswool roller or a glaze brush using cross-wise strokes.

Brush-applied clay plaster

conlino brush-applied clay plasters combine the simple application of clay paint with the raw charm of a clay plaster. Through the addition of pearlescent sand, smooth walls can be given a granular surface texture. The texture scatters the light, lending surfaces a subtle shimmer and greater colour intensity. Walls have more character and a stronger sense of depth. Like clay paints, brushable clay plasters can be applied to nearly all backgrounds.

Application: with a glaze brush.

Deco clay facing plaster

conlino deco clay facing plasters can be used in a multitude of ways to give your home a particular quality of its own.

Their characteristic subtle cloudy appearance and high-quality materials create comfortable interiors with a pleasant room climate.

Explore the creative possibilities of conlino clay facing plasters and give your home a unique and personal ambience.

Application: with a Japanese trowel or smoothing trowel.

Clay smoothing plaster

conlino clay smoothing plasters are in a class of their own. Applied with a trowel, they are used to create surfaces of exceptional quality and natural beauty for interiors with a unique character.

Their distinctive material produces surfaces with a fine marbled-like colour and sheen.

Clay smoothing plasters are perfect for creating elegant and refined home interiors.

Application: with a Japanese trowel.

Draw from the palette of nature!

The vivid spectrum of colours in the conlino range is the perfect basis for creating your own particular living environment and bringing new life into your home.

Whether used as a colour accent or as part of a coordinated colour concept, conlino paints and plasters open up untold creative possibilities.

Bring the flair of entire landscapes into your interiors with the evocative colours of conlino.

The world
speaks in colours.
It is the simplest
and best language
that there is:
because it is so
direct and welcoming!

Klaus Lutz, Swiss Artist

A better, simpler way of life!

Ecological building is no longer the niche market it once was. People now recognise the importance of building in ways that are in tune with the environment. Made only of pure earths and clay, conluto's products perfectly match the spirit of the age.

Made without binding agents and preservatives, conlino products make a direct contribution to your own personal healthy living environment – for years to come.

In addition to their health benefits, conlino products also have an excellent ecological balance and are completely recyclable.

conlino is produced by the specialists at conluto who over the past twenty years have consistently striven to achieve the highest standards in the development and production of ecological earth building products.
