## GUIDE TO FINDING YOUR BRACELET SIZE

*Measuring for a bracelet size is important to ensure that it will fit comfortably on your wrist. We've put together this helpful guide so you can easily find your size at home. Simply download and print this guide at 100% to get started!*

*Tip: Make sure the ruler above matches the numbers on a real ruler - this will ensure correct sizing.*

*Tip: Cut along the dotted lines to the right (including the slit below the words "YOUR SIZE"). Slip the pointed end through the slit to form a loop.*

### FOR LINK BRACELETS

Tighten the paper where it feels comfortable or how you would like to wear your future bracelet. It should be loose enough to allow easy movement, but not enough that it would slip over your hand or too far up your arm. You should be able to slip a finger between your wrist and the paper.

### FOR BANGLES

With your hand relaxed, tighten the paper over your pinky knuckle and index/pointer knuckle.

### MEASURING WITHOUT A PRINTER

If you do not have a printer, you can still use string and a ruler in a similar manner.

1. Wrap the paper or string around your wrist. It should be snug but not tight. For Bangles, you will measure from your pinky knuckle to your index knuckle.
2. Mark or keep a finger tip where the size is comfortable.
3. Measure the length of the string at the point you have marked to get your true wrist size.

### DETERMINING THE BEST SIZE

For a **snug fit** we recommend adding 1/2" to the true size of your wrist.

For a **standard fit** or charm bracelet, we recommend adding 1" to the true size of your wrist.

For a **loose fit** or if the bracelet is thicker, we recommend adding at least 1".

*If ordering a bangle, keep in mind the size needed to fit over your hand but not be so large that it moves excessively and risks slipping off.*
