

HOW TO FLATTEN A POSTER

1

Take the poster out of the product package and remove all packaging materials from it.

2

Roll the poster out on a clean, flat surface with the printed side pointing down.

3

Roll the poster carefully to the opposite way to which it has been rolled previously.

4

Wrap rubber bands around your opposite-rolled poster and leave it for 2 hours.

5

Remove rubber bands and unroll the poster. Place the poster on a clean, flat and hard surface.

6

Place something heavy (for example books) on each corner and in the middle to weigh it down, leave this for 4 hours.

7

Remove weights to reveal a completely flat poster.

! TIPS:

1. If your poster continues to curl after completing step 7, keep the weights on for longer.
2. Work gently to avoid causing wrinkles or creases to the poster
