A *Love* LIKE NO OTHER®

BAMBO
Nature

Top Dry Acquisition Layer

Our super absorbent, three-layer design pulls moisture away from the skin, thus ensuring dryness and reducing the likelihood of a rash, even after multiple wettings.

Ultra Flexible Side Panels

Our refastenable hook tabs allow for easy repositioning, while our flexible side panels ensure a snug yet comfortable fit. Perfect for all day and all night protection.

Ultra Soft Materials

Baby's skin is fragile and vulnerable. We source the softest materials for comfort and protection.

Guaranteed Skin-Safe

Our diapers are dermatologically tested, totally chlorine free, and free of all known allergens and harmful chemicals.

Thinner Design

Using improved technology, we created a thinner diaper design that allows for maximum absorbency without adding bulk for optimal mobility.

Leakage Prevention

Our diapers are anatomically designed and feature strategically placed barriers to reduce the chance of leaks and blowouts.

Fully Breathable Backsheet

Our fully breathable backsheet promotes a cooler, more comfortable experience and helps keep fragile skin dry, thus reducing the likelihood of rashes and irritation.

Wetness Indicator

Our new liquid-sensitive strip changes color to indicate wetness so parents can stay in-the-know. Now available on all diapers sizes 1-6.

Our disposable baby diapers are free of harmful chemicals and all known allergens so they are certified skin-safe and perfect for sensitive skin.

Bambo Nature's unique, fully breathable backsheet keeps your bundle of joy's skin dry, while flexible latex-free leg cuffs and waistband enhance mobility for a more playful playtime.

Speaking of performance, Bambo Nature diapers have a super absorbent three-layer design that makes them ideal for overnight protection. And parents, you can rest easy because our new wetness indicator strip helps you know when changes are needed.
