

Colour Translation Service

Objective and professional translations from one colour system to the closest matching colour in another system or collection. Perfect for designers and architects that needs the closest colour notation in a different system than they have been given.

Translations are performed by a Colour Expert at NCS Colour AB according to ISO standards in a professional light booth.

AVAILABILITY & FORMAT

- Notation-to-notation matching between standardized colour collections such as Pantone, RAL and NCS
- Colour sample-to-notation matching between your custom colour samples and standardized colour collections
- Colour assessment in light booth according to ISO 3668:2017
- Colour translation report with nearest matching colour in selected colour system or collection.
