

4-terminal  $\Omega$  function **3239**  
 Advanced model **3238**  
 Economically priced **3237**

Outstanding performance for production lines with a sampling rate of 3.3 ms

# High-speed 5 1/2 digit DMM

The DIGITAL HiTESTERs 3237, 3238, and 3239 can perform 3.3 ms high-speed sampling, and come equipped with a comparator, external input and output, and an RS-232C interface. These three high-performance DMMs can be used not only in laboratories, but in production lines that require the minimal tact time.

The 3237 is the basic model, and is equipped with the basic necessary functions. The 3238 is a high-precision, broadband model that also features current measurement terminals and a frequency measurement function. The 3239 includes the functions of the 3238 plus the 4-terminal resistance measurement function. All three units are designed with emphasis on measurement speed and safety.

# 3.3 ms/sample

## High-speed Performance and Reliability

### Features

- Samples at rates of up to 300 samples/sec. (3.3 ms/sample)
- Comparator function provides high-speed pass/fail evaluation
- Equipped with external input and output for sequence control
- Useful Save/Load function helps work go faster

The 3237, 3238 and 3239 are equipped with a variety of functions that help minimize tact time in production lines.

For details, see page 2.

- Low power resistance measurement function prevents sample deterioration

The 3237, 3238 and 3239 use a low power  $\Omega$  function to minimize sample degradation when measuring resistance.

■ **Using Excel for efficient data processing**  
 The DMM supports fast data processing by allowing you to transfer data directly to a worksheet through either the GP-IB or RS-232C interface.

Consult your nearest HIOKI dealer for details on software

## ■ Supports large AC current measurement by clamp sensor

■ **Easy setup ~CLAMP**

Both the 3237, 3238 and 3239 can measure live line currents using an optional clamp sensor. Enter the name of the clamp sensor being used and display current values simply by selecting a range.
