## HIRF Hardened Colour Camera

Cam80P-HIRF has been designed to meet High Intensity Radiated Field (HIRF) according to RTCA-DO-160, G and Q. This design now operates in field strengths of 1000 v/m (PM) up to 18 GHz and also 3000 v/m (PM) at some frequencies. It's compact size and excellent video performance make the right choice for all application, where a remotely controlled camera with good optical resolution and a wide zoom range is needed. Automatic focus and white balance help to get a clear picture at any situation.

The camera can be operated by the PONTIS EMC controllers.
