- Add participants on-the-go
- Auto power off 5 min
- Auto pairing
- Easy to use and clean
- Standard 2-pole 3.5mm microphone input (transmitter)
- Built-in microphone (transmitter)

The Univox **GOTOUR** is an ultra-compact digital tour guide system featuring the GT0-T transmitter and the GT0-R earpiece receiver.

**GOTOUR** provides a cable and headphone-free experience, allowing you and your group to be fully immersed and focus on what matters most – your tour.

Participants will enjoy crisp, clear sound, enabling them to concentrate wholeheartedly on the information, without the distractions of tangled cables, lost headphones, or the need for uncomfortable, disposable earpieces.

**GOTOUR's** GT0-R fits comfortably on either ear due to its minimal weight and ergonomic design. Made from recycled materials, the GT0-R is durable, easy to keep clean and disinfect.

The **GOTOUR** GT0-T transmitter and GT0-R earpiece receiver are easy to operate with just a few buttons, eliminating the need for extensive instructions.

**GOTOUR** is effortlessly plug-and-play. Simply power on the transmitter, turn on as many receivers as needed, and you're ready to go. Once your tour is finished, power off the transmitter, and the receivers will automatically turn off after five minutes.

## APPLICATIONS INCLUDE

- + Guided tours
- + Field trips
- + Presentations
- + Workshops
- + Interpretation

And more...
