

SPECTRUM DIAL

LED SPECTRUM CONTROLLER

A feature rich DMX 512 lighting controller designed to provide a control solution for the most demanding of grow spaces, while still maintaining an easy to use panel of touch sensitive buttons. This controller allows growers to group lights into zones and trigger spectrums easily through the LCD interface. The lighting levels and color can be programmed from a PC, Mac, Android, iPad or iPhone. Using the included software, Growers can customize sunrise to sunset lighting spectrums or anything they want at the tip of their fingers.
