Our STORY

Like Yin & Yang

We were drawn together in acupuncture school as two opposites in perfect balance. TOMA is the result of our friendship and our shared passion for the transformative teachings of Five Element Acupuncture combined with years successful spa ownership and operations.

As holistic health practitioners, we see the skin as a reflection of what is within. Rather than treating skin at just the surface, we use needles, cutting edge technologies, powerful plant therapies, and lifestyle shifts to address skin imbalances at the source, empowering your body to do what it is biologically programmed to do: heal and repair itself.

Partnering with like-minded wellness providers is our passion! We are thrilled you have decided to explore the world of TOMA.

Our COMMITMENT

Total Transparency

CLEAN INGREDIENT SOURCING

Made in small batches, our ingredients are harvested from their natural habitat. They are grown without pesticides, herbicides, synthetic fertilizers, or chemicals of any kind.

NO HORMONE DISRUPTORS

Ingredients that negatively impact your delicate hormone system are hiding in most skincare products. At TOMA we go beyond the standard "free of" list by promising that our formulas are 100% free of hormone-disrupting ingredients and by-products, including parabens, synthetic fragrances, GMOs and phthalates.

CRUELTY-FREE PROMISE

Vegan, Animal-friendly, Cruelty-free, our pledge is your assurance that we have no products that contain any animal ingredients or animal-derived ingredients (i.e. beeswax, lanolin, honey). We also do no animal testing, nor do we work with companies that do.

FAIR LABOR PRACTICES

Each of our suppliers is vetted by a fair-trade organization. That means that employees and workers along the supply chain, from harvest to your home, are treated fairly and ethically.

SUSTAINABLE PACKAGING

In addition to clean, organic formulas that are good for your skin and the earth, we source our packaging and components for sustainability, recyclability and reuse. We also believe in simplicity in our product offering-which means fewer, better products that lead to less waste.

Our EQUIPMENT

Transform your business with a partner you trust.

TOMA is a culmination of decades of study, thousands of happy clients, and a deep respect for the ancient wisdom of acupuncture. Combining modern on-trend medical treatments like microneedling with ancient practices like gua sha,

TOMA creates truly transformative spa experiences. Thousands of professionals: acupuncturists, estheticians, massage therapists, and physicians, have partnered with the leader in and equipment continuing education for esthetic acupuncture.

Our medical-grade devices manufactured in a FDA-approved facility, insured, and backed by a 100% lifetime warranty against manufacturer defects.

Product KEY FEATURES

Essential Oils

TOMA uses the healing benefits of essential oils and Chinese herbs for medicinal purposes only, not for scent. TOMA formulations include the safest percentage of essential oils and herbal extracts for skincare products.

Cleansers are formulated with .5% essential oils.

All other products are formulated with less than .25% essential oils.

The Secret is Less

As service providers, the top complaint we hear from clients is having little time for self-care. As TOMA has evolved, we chose to scale back the line to introduce the concept that less time and products are needed to achieve vibrant skin.

We believe everyone can achieve gorgeous skin with the 4 steps found in our Essential System. To address specific needs, enhancements may be layered with the system for enhanced results.

Our Formulas

We recognize that elemental imbalances often show up as varying states of skin stress. However skin stress manifests – dryness, irritation, breakouts or uneven tone – our formulations bring skin back to radiant balance.

The key is botanical ingredients that are adaptogenic in nature, meaning they adapt to the skin's needs to restore balance. That's what we mean when we call our formulations bioadaptive: they can shift their effects based on what one's unique skin requires.

Ultraviolet Glass

Miron glass is more than just beautiful. Biophotonic glass prevents photoaging and protects the quality of ingredients while activating and energizing the healing energies of the ingredients stored inside this unique violet bottle. While many skincare companies use brown and green glass bottles due to cost and esthetics, it provides little protection from degradation caused by light. Miron glass increases the shelf life of the product by one year and is 100% recyclable.

Our ESSENTIAL SYSTEM

A Simple Approach

Our complete skincare ritual nourishes with the power of bioadaptive herbs. It begins with a cleanser to support a specific skin type and ends with targeted treatments based on individual skincare goals. By treating imbalances in the fundamental systems that impact your skin's health, this simple ritual removes the guesswork and results in skin that is naturally at its best, healing and improving from within.

ESSENTIAL STEP 1

Cleanse with either Balancing or Rejuvenating Cleanser.

ESSENTIAL STEP 2

Twice weekly, and in lieu of chosen cleanser, wash with Exfoliating Cleanser.

ESSENTIAL STEP 3

Use Replenishing Mist to prep skin for ultimate absorption of ingredients.

ESSENTIAL STEP 4

Press Bioactive Regenerating Oil onto face and neck.

ENHANCING STEP 5

Add additional products for personalized, targeted skincare needs.

Our CLEANSERS

Start your skin ritual by using one of our three gentle cleansers to address what your skin needs at the moment.

Cleansing prepares your skin to absorb the following products in your skin ritual, making it one of the most important skincare steps.

We keep all three of our cleansers on our bathroom counter so we can address what our skin needs based on the time of day, season, or our hormonal cycles.

Our OILS

The Science Behind Facial Oils

A typical face cream is made of mostly water and wax with only a few oils added. The wax added to hold moisture in the skin can accumulate in pores and cause breakouts. Additionally, the barrier the wax forms over the skin prevents most helpful ingredients penetrate past the top layer, the stratum corneum, into the epidermis.

Facial oils penetrate beyond the surface of the skin to the lipid barrier, where dry skin typically starts. Key vitamins, antioxidants, and essential fatty acids in the facial oil begin to work immediately and continue working to replenish the natural oils lost due to aging, sun exposure, and environmental toxins. Facial oils also aid in repairing free radical damage, reducing inflammation, and protecting the lipid barrier against environmental pollutants.

Most importantly, using a face oil doesn't cause oily skin or breakout. The right facial oil can actually help clear clogged pores. The key is finding the right facial oil with the best ingredients. Our Bioactive Regenerating Oil is ideal for all skin types and results can be enhanced with our serums.

Oils

BIOACTIVE REGENERATING OIL

Why is TOMA's Vitamin C SERUM DIFFERENT?

Formulated directly from citrus and in a highly stable ascorbic acid polypeptide, our vitamin C is superior in contrast to synthetic based serums.

This full chain amino acid penetrates the skin more effectively and targets the deeper layers of the epidermis where melanocyte cells are located. As an antioxidant, vitamin C decreases melanin synthesis, protects against UV photodamage, and increases collagen production. Also important is the pH, which determines ability to absorb. Our Cellular C Serum's pH between 3-4, the most effective acidity for maximum absorption.

How to Layer ENHANCEMENTS

Layering enhancements with our foundational products offer the most benefit, as serums and eye cream target specific skin's needs.

LAYERING STEPS:

1. On cleansed and prepped skin, apply a thin layer of serum(s) and eye cream and allow them to absorb.
2. Follow with Bioactive Regenerating Oil.
3. Finish with choice of moisturizer for additional hydration and to lock in the serums.

Acuglow™ SCULPTING STONE

MSRP: \$68

Carved from bian stone, the material that has been used for centuries in Traditional Chinese Medicine, this tool eliminates toxins, reduces inflammation, and lifts and tones the skin. A pictorial guide detailing our proprietary gua sha technique is included with the stone.

This ancient stone was formed almost 65 million years ago when a meteorite collided with Earth. Traditionally used to shape many types of gua sha tools, bian contains 40 trace elements and minerals that benefit the skin through ultrasonic impulses.

Microneedling & Gua Sha SERUMS

HYALURONIC ACID (HA) SERUM

A serum to lock in moisture, allowing the safest glide for Micro- and Nanoneedling.

TO USE: Apply directly to the skin with fan brush and add more as needed

WHAT IS HYALURONIC ACID AND USE HIGH MOLECULAR?

Hyaluronic acid is a natural part of the body. It provides moisture and serves as a lubricant in our connective tissues, nervous system and epithelial tissue that line the organs and blood vessels. As we age, our bodies produce less and we see some decline in our joints, eyes, skin, etc.

For micro- and nanoneedling, it's ideal to have the serum remain on the surface of the skin versus being absorbed quickly. This is important because you use less product, have better glide for the tool and see more visible results immediately. HMW means the molecule is larger therefore the weight is higher, it must be >1,800,000 daltons (or atom mass unit)

Low molecular (LMW) hyaluronic acid is more advantageous in skincare products since it absorbed quickly and cumulative benefits can be seen. This usually is 400,000 to 1,000,000 daltons.

EQUIPMENT

Equipment MICRO+ PEN

Microneedling is a minimally invasive facial rejuvenation treatment that stimulates the skin's natural healing process to remodel the skin.

Through the creation of these intentional microtraumas, the production of collagen and elastin are significantly enhanced while the absorption of products is increased up to 2000%. The overall effect is a more even skin tone that appears taut and glowing.

Nanoneedling may be done between treatments to continue with skin resurfacing and improved texture.

Nanoneedling increases cellular turnover and collagen production as well as product absorption. The microscopic tips target the entire face and are safe to use around the eyes and lips.

BENEFITS OF BOTH INCLUDE:

- REDUCED APPEARANCE OF FINE LINES & WRINKLES
- IMPROVED HYPERPIGMENTATION AND AGE SPOTS
- IMPROVED EFFECTS OF SUN DAMAGE
- DECREASED PORE SIZE
- IMPROVED SKIN TEXTURE AND ELASTICITY
- DECREASED ACNE BREAKOUTS
- DIMINISHED SCARS

Equipment SONIC DERM

Gently exfoliates with the use of a metal spatula delivering an ultrasound vibration of up to 28,000 cycles per second. Our tool removes dead skin cells, revealing brighter, clearer skin.

FOR EXFOLIATION:

Hold tool so that curved angle is facing down. On a cleansed, wet face, move the stainless steel scraper in one direction. The tool should be angled about 45°. Multiple passes can be made, ensuring skin is wet.

Equipment LED RAINBOW LIGHT

LED is an excellent complement to skincare treatments. With six varying wavelengths of light to reduce inflammation, fine lines, hyperpigmentation, collagen loss and more with one machine.

RED LIGHT: Stimulates collagen production, reduces inflammation, promotes wound healing, improves fine lines. Excellent after a peel or Gua Sha, good for NM after one week. Excellent for inflammation and pain in joints.

YELLOW LIGHT: Treats redness, sensitivity, irritation, and rosacea. Reduces the appearance of the tiny blood vessels.

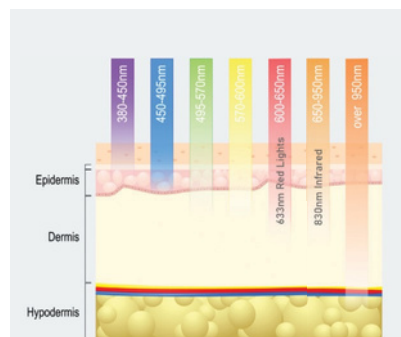

GREEN LIGHT: Treats and prevents hyper-pigmentation by inhibiting the production of excess melanin.

CYAN LIGHT: Gentle acne treatment, perfect for combination aging skin, controls oil production and promotes collagen synthesis.

BLUE LIGHT: Kills bacteria and reduces over sebaceous gland production.

PURPLE LIGHT: Combination of red and blue benefits.
