

## Taking Pictures for Proposals

(1) Take a picture of the switchgear from far away (Pic.1) that has the entire line-up in the view in order to verify proper clearance in front of switchgear.

(2) Take a picture of the breaker with the door closed (Pic. 2) to verify racking screw placement.

(3) Open the door and take a full length picture of the breaker (Pic. 3).

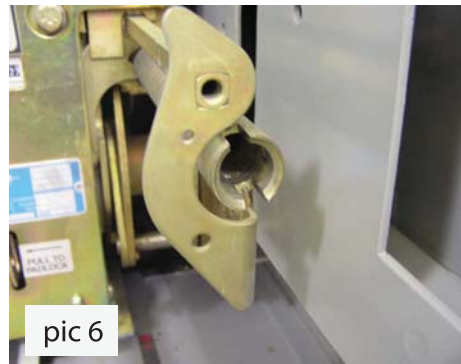

(4) Take a close-up of the name-plate (Pic. 4).

## Taking Pictures for Proposals

---

(5) Take a close up of the racking screw (Pic. 5) and any inter-lock devices (Pic. 6) required to rack the breaker.

(6) If available please take a picture of the business end of the racking tool (Pic. 7 & 8).

(7) After finishing a breaker, move on to the next breaker and go back to step 2.

(8) After finishing the switchgear line-up, move on to the next switchgear line-up and go back to step 1.
