

— INTRODUCING —

LX610 Color Label Printer

A world of design possibilities at your fingertips.

Print and cut custom labels of any shape or size –
all in one simple, unattended process.

LX610
COLOR LABEL PRINTER

PRIMERA
TECHNOLOGY, INC.

Why LX610 Color Label Printer?

Print Quality

LX610 produces gorgeous, professional-quality labels with color inkjet printing at up to 4800 dpi.

Automatic Built-In Die-Cutting

LX610's printing and precision die-cutting are incorporated into one easy, timesaving step. Just import your design and select a cut format. Choose from standard die-cuts - such as squares, circles or rectangles in any size, or a contour cut that automatically and precisely follows the outline of the image*. You'll never need to order a custom die again!

Wide Variety of Substrates

With LX610 you can choose from a wide variety of substrates, including White Gloss Polyester, Clear Gloss Polyester and White Gloss Paper. Additional materials are available if using pre-die cut stock.

*Contour cutting requires optional software upgrade.

Specifications
