

# Soft Filtered Water Extra

The BWT Soft Filtered Water EXTRA filter cartridge is specially designed to treat particularly hard water. This reliable reduction of the water hardness protects household appliances from limescale deposits. What's more: the specially developed filter also reduces heavy metals (such as lead and copper) and substances such as chlorine, which can affect the smell and taste. The result is a transformation of tap water into a premium-quality taste sensation.

+ the environmentally friendly alternative to plastic bottles

## ADVANTAGES OF THE FILTER TECHNOLOGY

+ Reliable limescale protection for household appliances like coffee machines and water heater: reduces the lime content in the water

+ Reduces odor and taste impairing substances such as chlorine and organic impurities

+ Reduces particles > 200 µm (sand, particles from the pipe) and heavy metals (lead and copper)

## Soft Filtered Water Extra
