

Mediterranea Design - 3D Printed Vase

Product Care

Your 3D Printed Vase will have many years of performance with regular care.

To maintain the nish quality of your product, please follow the cleaning procedures provided below.

It is very important to pay attention to the temperature fluctuations.

For normal cleaning of the ceramic surfaces, use a soft scrub brush (that it is not metallic, and that it is not a sponge that could cause scratches) to remove dirt particles between the lines and then wash with a white micro fiber cloth (or other lint-free cloth) and water.

If heavier cleaning is required, use a mild soap along with the cloth and water. Do not use solvents or abrasi - ve cleaners.

After cleaning, rinse with warm water and dry with a soft cloth.

Medaarch declines all responsibility in the event that these maintenance conditions are not respected.

The vases are decorative. Insert a container inside the vase to fill it with water.
