Copper Alchemy is a boutique designer and manufacturer of functional copper works of art. Our product line includes copper bathroom, kitchen and bar sinks, bathtubs, cooper tables and copper accessories. We can also customize any copper sink design that our customers desire.

All of our products are 100% handcrafted by the families of our artisans for over eight generations...since 1538.

Our copper sinks are created entirely by hand using the same ancient "martillado" (hammered) technique used centuries ago. Each sink is one of a kind and a functional work of art.

Copper Alchemy is a green company and we are fully devoted to protecting our environment by recycling the majority of the copper used in our products and the wood used as a source of energy.

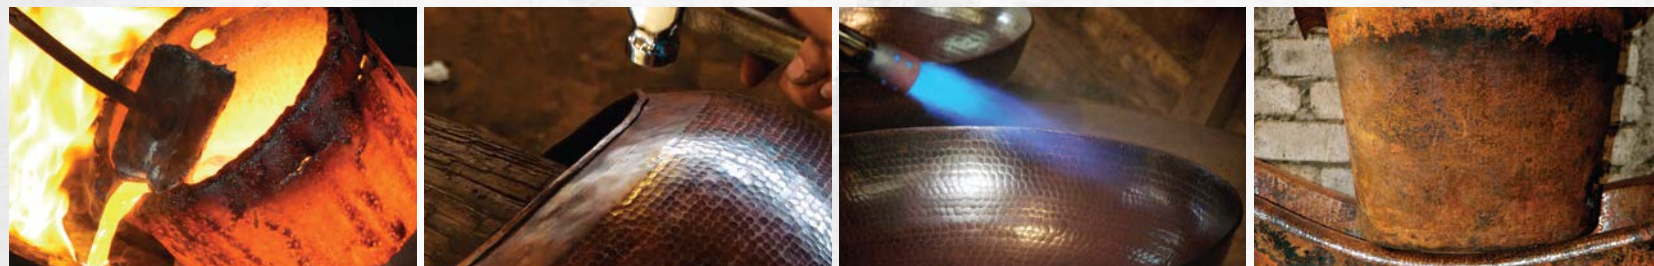

Copper has extraordinary antibacterial properties. It kills hazardous bacteria such as E. coli in only a few hours, as opposed to stainless steel and other conventional surfaces where bacteria can be present for days (in some cases weeks), making it ideal for kitchen, bathroom, and bar sinks.

Our Bathroom Collection offers copper vessel sinks of thick gauge #14 and double wall designs, both types are very exclusive in the industry. We also offer raised-profile sinks and under-mount sinks. Our Kitchen Collection includes copper farmhouse sinks with straight and curved aprons and double or triple basin sinks for larger kitchens and commercial applications. We feature a large selection of copper sink styles, shapes and finishes that are guaranteed to exceed your expectations.

We carry various matching drains and faucets that will work and look great with our copper sinks offering a one-stop shopping experience to ensure the success of your project.

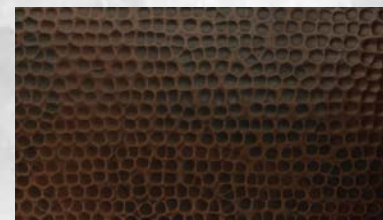

We also design and build to order unique stone sinks, all by hand, one piece at a time.

As a company, Copper Alchemy is committed to providing the highest quality products, excellence in customer service and the most beautiful pieces of art that will resonate in your home forever.

*We have a true passion for what we do and we never compromise.
Based in California we create spectacular works of art. Thank you for your refined taste...
enjoy our dedication.*

CAFE VIEJO

Our most popular finish is the CAFE VIEJO (CV). It is primarily medium- dark brown with black hues and occasionally will show very small areas of deep burgundy. It is a warm finish with a lot of character. This finish is very consistent and repetitive and even though each sink is unique you will receive a sink very similar to the pictures shown in our on line store. It is also a strong finish and will last for years to come. The Café Viejo finish matches very well with the common Oil Rubbed Bronze finish found in Faucets & Drains making it one main reason for its popularity. When ordering two or more sinks that will be installed in the same place, we prefer to order them directly from our suppliers so the sinks are manufactured from the same batch and by the same artistic hands of our experienced artisans; this way we can ensure a very close cosmetic appearance. Other Faucets and Drain finishes that match well with this Cafe Viejo finish go by the names of Victorian Bronze, Venetian Bronze, etc.

NATURAL

Our Natural finish is the most rustic and versatile copper sink finish. It is truly unique with tones of orange, yellow, black, medium brown, light brown and occasionally reddish tones. This is our most varied finish due to the natural process (wood fire) used to create it. Based on the climate conditions of temperature and humidity at the time that the sink is made, some sinks will have more mix of colors, saturation & contrast than others. We can't duplicate exactly the same finish showed in the pictures of our web site for the reasons previously explained. In order to highlight the dark colors of the Natural finish (Browns and black) it is recommended to use Oil Rubbed Bronze or Victorian Bronze finishes for the matching Faucets & Drains. When ordering two or more sinks that will be installed in the same place (Especially the Natural finish), we prefer to order them directly from our suppliers so the sinks are manufactured from the same batch, same artisan and under the same weather conditions.

FUEGO

Our exclusive Fuego finish has golden and copper tones. The saturation of the golden and/or copper colors can vary from light to deeper tones. This finish is created using a torch-fired process where the heat is applied to the sink in circular motions and/or linear patterns. Even though each piece is unique and one of a kind, the cosmetic look of this finish is fairly consistent and repetitive. When ordering two or more sinks that will be installed in the same place, we prefer to order them directly from our suppliers so the sinks are manufactured from the same batch and by the same artistic hands of our experienced artisans; this way we can ensure a very close cosmetic appearance. We offer nice matching Faucets & Drains in Antiqued Copper that complement our Fuego finish.

BRUSHED NICKEL

Our Brushed Nickel is a CUSTOM finish and it is only built to order. The lead time for this finish is 4 weeks to be delivered. This finish is also called Satin Nickel; it is a cooper sink fully handmade and hammered just like the rest of our sinks but with an additional Nickel Plating. This finish is accomplished by plating nickel over copper and then meticulously hand-brushing the piece. The best matching Faucet & Drain finish is also the called Brushed Nickel. We offer a few faucet & drain options in Brushed Nickel that will complement your sink beautifully.

All of our Copper Tables are Made to Order (MTO). Lead time is 3 to 4 weeks to be delivered. All prices include Free Shipping and No Tax (Unless you are a California resident). We primarily sell table tops but you can purchase the complete table with the legs as well (Legs need to be assembled and all hardware is included).

We offer a large selection of sizes and shapes. If you are looking for something more specific, we are experts at custom work. The table tops are made using a 1.5" thick corrugated fiber board which is covered (Pressed and glued) with a laminate of hammered copper (The finish can be smooth if you prefer). We offer 9 different finishes all at the same price. The legs are made out of wrought iron and they are painted black. We offer complete copper tables in different shapes and sizes but if you prefer you can also choose a leg design and we can provide you with a quote based on the size & shape of the table top you selected.

OUR MOST POPULAR FINISHES ARE THE:

BROWN TTF 001

DARK BROWN TTF 002

NATURAL STAINED TTF 003

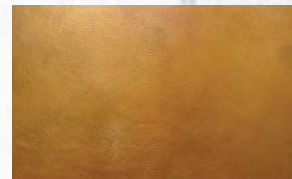

NATURAL TTF 004

NATURAL WITH RED TTF 005

ORANGE TTF 006

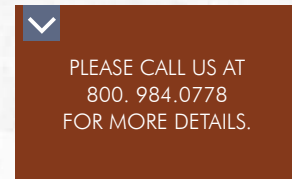

SEDONA TTF 007

DARK TTF 008

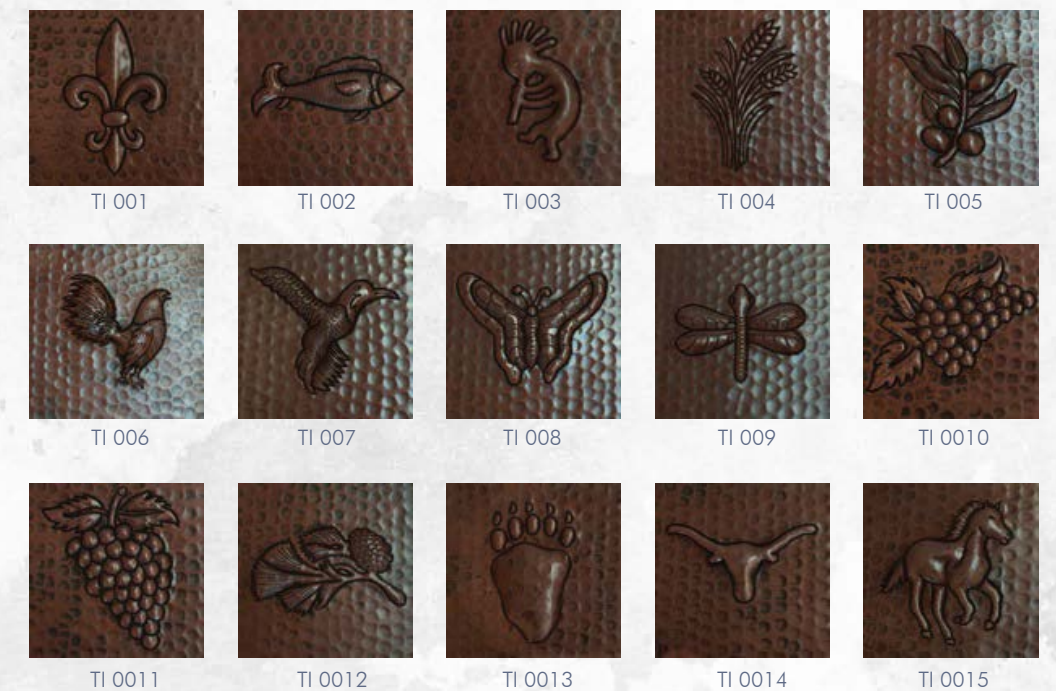

FUEGO TTF 009

We can also add Clavos in different shapes and finishes to the edge of your table top. The edge thickness of our table tops is 1.5" (We can also make it thicker) so we recommend 1" clavos or smaller.

Any of these apron designs can be applied to the aprons of our Farmhouse style Kitchen Sinks (Curvo or Straight) for an additional fee of \$100.00. If you have a special design we can gladly make you a custom piece as well.

Any of these designs can be applied to any of our sinks for an additional fee of \$50.00 (Up to 4 designs). If you have a special design we can gladly make you a custom piece as well.

We have an exceptional collection of copper bathroom sinks. Our Classic copper bathroom sinks collection includes standard under mount designs in different sizes and finishes. Our Masters of the Arts copper bathroom sinks collection includes our premium Vessel Sinks that can be fully or partially exposed. Our Vessel Sinks are made of very thick gauge 14 making them very exclusive in the industry.

Our Limited Edition copper bathroom sinks are uniquely design for the most demanding tastes and applications. Our Double Wall Vessel Sinks are truly works of art and consider the most prestigious bathroom cooper sinks that we offer.

For our copper bathroom sinks we offer 3 standard finishes and one custom finish. Our standard finishes are :

CAFE VIEJO

NATURAL

FUEGO

Our custom finish is in Brushed Nickel (BN) and it is only made to order.

BRUSHED NICKEL

The Unique and Exclusive Masters of the Arts collection pieces are hand made of a very thick copper gauge # 14 (the lower the gauge number the thicker the copper - refer to images below) and some pieces have unique double wall designs; both extremely rare in the industry.

We offer high quality copper kitchen sinks with apron front and without it. The kitchen copper sinks collection includes different designs and sizes in order to accommodate a variety of installations. Like the rest of our copper sinks our kitchen hammered copper sinks are manufactured under strict quality control guidelines that include TIG welding (with copper rods) for a very strong weld and long term durability. We also offer custom options for all of our kitchen copper sinks.

The most relevant factors to be considered during the manufacturing process include how the corners are constructed (interior edges and corners have to be smooth and free of burs), the welding technique, the finishing process and the proper dimensions and tolerances for ease of installation.

Our copper kitchen sinks like the rest of our copper sinks are hammered copper sinks. As part of the manufacturing process our copper kitchen sinks are heat treated twice and 100% hammered given the copper sink a very strong rigidity and therefore long term durability.

One of the most important benefits of kitchen copper sinks is that copper sinks have Antibacterial Properties – Research has shown that copper sinks help combat and kill dangerous bacteria such as E-coli and more. While deadly bacteria can live for up to month on a stainless steel surface copper has been shown to wipe them out completely in less than 14 hours. This is because of the natural density of copper – it does not have the microscopic crevices and pits for bacteria to hide in.

Our custom finish is in Brushed Nickel (BN) and it is only made to order.
