# VZ-X Firmware Update

First, download the Firmware .bin file here and save it to your desktop.
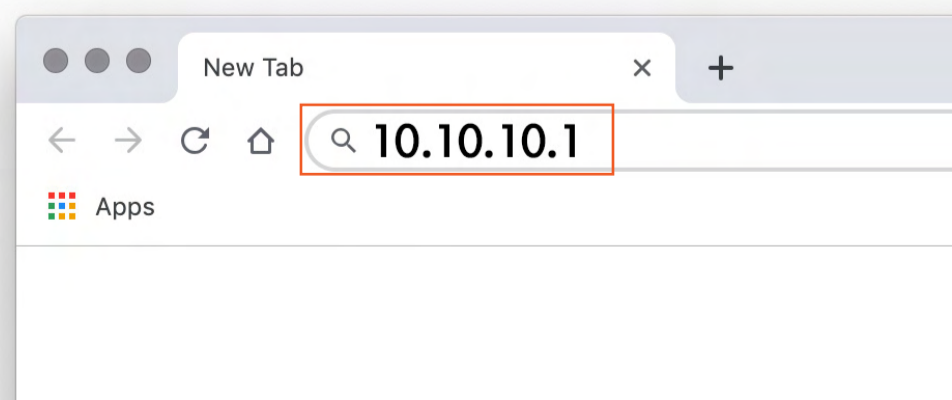

.bin Click Here

We also recommend that your VZ-X is plugged into a power source before performing the update.

❶ Connect your computer's Wi-Fi to the VZ-X.
Here you can learn how to connect your VZ-X to Wi-Fi.

❷ Open a browser of your choice and type in the following address: **10.10.10.1**

New Tab

🔍 10.10.10.1

⊞ Apps

3 The default login is "**admin**" and the password is also "**admin**".

Welcome to VZ-X Advanced Settings Page

Here you can manage VZ-X's Wi-Fi network settings and other advanced settings.

Account: **admin**

Password: **admin**

For first-time login, please enter the default account and password:
- Account: admin
- Password: admin

Log in

4 At the bottom of the Advanced Settings Page and under the Firmware Update section, click '**Import**'.

Firmware Update

Firmware version: **VZ-X_00000000**

Import firmware updates downloaded from IPEVO here.

Import

5 Select the **.bin** file you downloaded and **check the box**.

Firmware Update

Firmware version: **VZ-X_00000000**

File: **VZ-X_2033.bin**

Please read the following carefully before you proceed with the update:
- Make sure VZ-X is powered on throughout the process
- Do not touch any camera button/switch or close this window

☑ I have read and understood the above

6 A countdown process will initiate. **DO NOT turn off the VZ-X while it is updating**. The white LED will blink continuously while updating which is normal.

7 Once the white LED stops blinking, the amber LED will turn on and the VZ-X should disconnect automatically from your computer indicating a successful update. You can now reconnect to the VZ-X and sign back into the Advanced Settings Page to verify that the firmware version has been updated to VZ-X_2033.

Firmware Update
