

Bees are fun (and other facts)!

When collecting nectar to make honey, a honey bee may visit 50-100 flowers during the "collection trip."

Honeybees never sleep. They're busy pollinating one out of every three bites we eat.

(you did it!)

(start here)

Bees are speedy! They can fly as fast as 15 mph (and six miles!)

Honey has been used in medicine for over 5,000 years.
