

DIY Fun & Colorful Earth Day Magnets

INSTRUCTIONS

Check out how this DIY project which transforms a boring refrigerator, chalk board or locker into work of art.

1

Gather a few dozen bottle caps. Of course we prefer Me & the Bees bottle caps. We have been saving our caps in a special place every time we drink a bottle of lemonade.

2

Choose which template you want to use: Go to www.meandthebees.com/blog. Got to our Earth Day Blog titled "Get Buzzy." Download either or both Colorful Earth Day Magnets or Fun Honey Bee Magnets. Print out the image. We think it looks best in color.

3

Cut the image out. You can do this with a pair of scissors. We marked the edges to help make the circles perfect. Take your time.

4

Glue a magnet to the inside of the bottle cap (try to center it). The best way to do this is to flip the bottle cap over and make a pea-sized dot using industrial-strength glue. Press a round magnet into the glue, and let it dry. A silver rare earth or neodymium magnet is highly recommended for this due to its strength; you can find them online and in arts and crafts stores.

5

Glue the image on the front/top of the Me & the Bees bottle cap. Press the image into the glue, and smooth out any wrinkles. Do not use too much glue, otherwise it will leak through the image. Let it dry. Don't worry. It is a quick dry.

6

Location Location Location — Use these masterpieces to add character to places like your locker and refrigerator. They are also great gifts, too. Don't forget to make some for you and don't hesitate to share your work. Tag us at @MikailasBees. We can't wait!
