

MycoRoots™ Mycorrhizae With Added Probiotic Bacteria  
 Manufactured By Mighty Plant, Inc. In The USA

# MycoRoots™ Mycorrhizae

MycoRoots™ is a dynamic blend of mycorrhizae fungi paired with highly effective plant and root growth enhancing microbes. MycoRoots™ water soluble recipe rapidly colonize the plants root system, sending thread-like hyphae out into the soil that act like roots, expanding the system by hundreds of thousands of times. Together the fungi & microbes produce a strong and massive root system which in turn, creates vigorous, productive crops.

MycoRoots™ contains 100% natural bio-active ingredients including 4 different Mycorrhizae species, 4 species of Probiotic bacteria, Amino Acids, Kelp, Yeast, Peptides and a secret microbial food

## Application methods

- ▶ Inject Into Irrigation Lines
- ▶ Transplanting Clones
- ▶ Apply dry to Roots
- ▶ Root/Soil Drench
- ▶ Seedlings

### Biological Ingredients

Bacillus amyloliquefaciens .....	5.6 x 10 <sup>7</sup> cfu/gram
Bacillus licheniformis .....	3.3 x 10 <sup>7</sup> cfu/gram
Bacillus megaterium .....	3.3 x 10 <sup>7</sup> cfu/gram
Bacillus subtilis .....	3.3 x 10 <sup>7</sup> cfu/gram
Total Count .....	6.6 x 10 <sup>8</sup> cfu/gram

### Mycorrhizae Profile

Glomus Clarum, Glomus Intraradices	
Glomus Deserticola, Glomus Mosseae	
Mycorrhiza total spores.....	100/gram
Mycorrhiza total propagules.....	500/gram

### Secret Microbial Food

To sustain and energize soil microbes, a proprietary microbial food is included to support & increase microbial density & function, resulting in a flourishing & highly productive root mass.

### Biological Carriers

- Cottonseed Meal
- Amino Acids
- Kelp

### Amino Acids

- Arginine
- Histidine
- Isoleucine
- Leucine
- Lysine
- Methionine
- Phenylalanine
- Threonine
- Tryptophan

Single case order minimums make it affordable for operations of any size to add Mighty Plant products to inventory
