

# Pioneer Firewood Rack with Seasoning Cover Assembly Instructions

Pioneer by Woodhaven

## Step 1:

Place 2 bolts in one side of the wide flat strap (A). Then take one of the four drilled, non-welded tubes (B) and slide the bolts through it. Proceed by adding one of the welded bottom tubes (C) and fasten with the flange nut using two 1/2" or adjustable wrenches to tighten. Continue with other side.

## Step 2:

Repeat the same process on the other end of the welded bottom tubes using the other flat plate (A) and two drilled, non-welded tubes (B) to complete the assembly.

**Step 3:** To prevent the possibility of this product tipping over, it MUST be placed on a hard, level surface. Concrete or concrete stepping stones may be used to create a hard, level surface.

**Step 4:** Fill with wood and place cover over wood. Cover will slide down over top of wood as wood is used, constantly keeping the top dry.
