VESA Pattern	725mm x 550mm	725mm x 550mm	800mm x 550mm	800mm x 550mm

Notable Differences

- The **MM700** has an available Recess Kit add-on (**RB100**) that allows the center arm to fold into the wall for a 1.75" flush-to-wall storage. The **MM540** and the **MM340** are not compatible with the **RB100** Recess Kit.
- The **MM700** has a 6" wide center arm allowing for firmer downward movement. The **MM540** and **MM340** have 4" wide center arms.
- The **MM700** has additional stability control, automatically adjusting for minor differences in wear of gas pistons. This keeps the mount level over time, eliminating the need for manual adjustment.
- The **MM700** includes cable routing boxes which attach to metal conduit, allowing any cables routed behind the wall to be concealed from hot fireplace components. The **MM340** and **MM540** do not include these.
- The **MM540** and **MM700** have a heat sensing pull down handle that turns bright red at 110°. The **MM340** has pull down handles, but they're not heat-sensing.
- The **MM540** and **MM700** have a built-in sound bar attachment below the TV and above the heat sensing handles. The **MM340** requires the purchase of a 3rd party soundbar attachment.
- The **MM540** and **MM700** include a horizontal swivel extender kit which allows you to swivel up to 60° in one direction if needed. The **MM340** does not have the swivel extender kit.
- The **MM540** and **MM700** have paintable wall covers that hide your mounting hardware. The **MM340** does not come with wall covers.
